Aims

The aim of the Fund is to provide both income, that is money paid out from an investment as interest, and capital growth, that is to increase the value of your investment. The Fund aims to outperform the average of the IA Global Mixed Bond sector over any 5 year period, after any charges have been taken out of the Fund. There is no certainty that either aim of the Fund will be achieved.

Data for the above tables is sourced by Investment Fund Services Limited (IFSL), Bloomberg and presented by Broadridge Financial Solutions Inc. Allocations are subject to change. Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting funds. The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality. When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality. The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment. In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended. The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss. The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.
