Ex dividend date(s)	Income payment date (s)
28th February	30th April
31st May	31st July
31st August	31st October
30th November	31st January

Aims

The aim of the Fund is to increase the value of an investment over a minimum of 5 years. The Fund will do this through a combination of income received by the Fund, which is money paid out of investments as interest, and capital growth, which is profit on investments held. The Fund aims to outperform the Bloomberg Global Aggregate Corporate Index (GBP Hedged) over any 5 year period, after any charges or expenses have been taken out of the Fund. There is no certainty that either aim of the Fund will be achieved.

Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting funds.

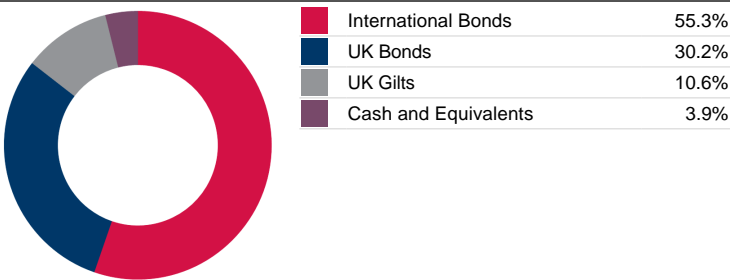

Performance data is sourced by Morningstar and is calculated on a NAV-NAV basis, net of fees and reinvestment of all dividends and capital gains. The remaining data is sourced by Investment Fund Services Limited (IFSL).

Data accurate as of 01/08/2025.

Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting funds. The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality. When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality. The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment. Bonds that produce a higher level of income carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity. In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended. The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss. The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved. All or part of the fees and expenses may be charged to the capital of the Fund rather than being deducted from income. Future capital growth may be constrained as a result of this.
