

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## IFSL Avellemy 3 Fund Class C Shares

A Sub-fund of the IFSL Avellemy OEIC (ISIN Income: GB00BJXFL013) (ISIN Accumulation: GB00BJXFZ104)

This Fund is managed by Investment Fund Services Limited (IFSL)

### Objectives and Investment Policy

The Fund aims to increase the value of an investment over a minimum of 5 years. The Fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '3'. The Fund's risk rating ranges from '1' which is classified as the lowest risk to '10' which is classified as the highest risk. The Fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

The Fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The Fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region.

Through these Investment Funds, the Fund is likely to be exposed to a higher percentage of lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The Fund will have lower exposure to higher-risk asset types such as shares in companies. The Fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The Fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The Fund may hold up to 10% in cash.

Whilst the Fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their: • view of the risk, return and other characteristics of the asset type; • assessment of the capabilities of the manager of the Investment Fund; and • view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the Fund.

The Fund's risk rating is not the same as the risk and reward category shown below. The risk rating of the Fund is verified against a risk ratings scale provided by an independent external agency, which is currently Distribution Technology, but is subject to change at the ACD's discretion.

The Fund's investment policy most closely aligns with the IA Mixed Investment 0-35% shares sector. The Fund is not managed to a benchmark, however you may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

### Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a

smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/07/2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23 - 25 of the Fund's Prospectus, which is available at [www.ifslfunds.com](http://www.ifslfunds.com).

### One-off charges taken before or after you invest

<b>Entry Charge</b>	5.00%
<b>Exit Charge</b>	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over each year

<b>Ongoing Charges</b>	0.72%
------------------------	-------

### Charges taken from the fund under certain conditions

<b>Performance Fee</b>	None
------------------------	------

## Past Performance

### Historic performance to 31 December 2023

	2019	2020	2021	2022	2023
■ Fund	–	3.9	5.1	-12.5	7.9
■ Benchmark	–	4.0	4.4	-11.1	6.4

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 15 April 2019.

This share class was launched on 15 April 2019.

Benchmark: Prior to 02/07/2024 the comparator benchmark of the Fund was the MSCI Dynamic Planner 3. As of 02/07/2024 the comparator benchmark of the Fund is the IA Mixed Investment 0-35% Shares..
