

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Blackfinch NextGen Infrastructure Fund Class A Shares

A Sub-fund of the IFSL Blackfinch OEIC (ISIN Income: GB00BQ2MXX90) (ISIN Accumulation: GB00BQ2MXR31)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of an investment over a minimum of 5 years. The Fund will do this through a combination of capital growth, which is profit on investments held, and income received by the Fund, which is money paid out of investments, such as dividends and interest.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when. The Fund will invest at least 80% in listed infrastructure securities, which will allow the Fund to gain access to infrastructure indirectly. That means it invests in companies or investment vehicles that themselves are involved in the direct ownership, operation, development, or maintenance of infrastructure assets. These investment vehicles include shares in infrastructure companies, investment trusts, real estate investment trusts ("REITs"), and master limited partnerships ("MLPs"), which are companies organised as publicly-traded partnerships typically used in the USA and Canada for investment into infrastructure projects. MLPs will make up no more than 10% of the Fund's assets.

When looking for investments to purchase, the Investment Manager will focus on those with exposure to infrastructure assets that serve next generation ("NextGen"), future growth needs in one of three key areas. These are: • Energy transition, such as renewable energy, energy storage, and grid transmission networks; • Digitalisation, such as communication towers, data centres, and fibre networks; and • Sustainable urbanisation, such as core and social infrastructure assets including sustainable waste disposal and transportation assets.

The Fund will have no minimum or maximum exposure to any geographic region, however a minimum of 75% will be invested in developed markets, with a maximum of 25% invested in emerging markets. The Fund will not invest in infrastructure projects or property directly.

The Fund may hold up to 20% in cash and cash equivalents such as money market funds, which invest in short term loans, to enable the ready settlement of

liabilities, for the efficient management of the portfolio and in pursuit of the Fund's investment objective. The Fund's exposure to money market funds will be limited to 10%.

Whilst the Fund itself will not use derivatives, the underlying investments purchased may have the ability to use derivatives to varying degrees.

The Investment Association (IA), the trade body for UK investment managers, has created several 'sectors', as a way of dividing funds into broad groups with similar characteristics. The Fund's Investment Policy puts it in the IA Infrastructure sector. You may want to assess the Fund's performance compared to the performance of this sector, however this benchmark is not a target for the Fund, nor is the Fund constrained by the benchmark.

The IA Infrastructure sector contains a diverse range of funds that invest at least 80% of their assets (directly or indirectly) in companies involved in the ownership, operation or maintenance of infrastructure assets. The sector can contain funds which focus on a particular industry or have a substantially different geographical asset allocation. This could result in the Fund over or underperforming the sector. The diverse range of funds within the sector should therefore be considered when assessing the Fund's performance. This should not prevent the Fund from meeting its longer-term objectives.

We recommend reading this information alongside the Fund's Sustainability Disclosure. This will help you understand further how sustainability is considered within the Fund's investment approach. You can find the Sustainability Disclosure at: www.ifslfunds.com.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can

be affected by changes in exchange rates.

The Fund invests indirectly in property, through property securities, such as real estate investment trusts (REITs). These are subject to similar risks associated with the direct ownership of property, including but not limited to: liquidity issues, fluctuations in the real estate markets, undesirability of properties, costs and terms of mortgage funds, and the impact of environmental laws.

The Fund invests indirectly in infrastructure-related companies and may be vulnerable to factors affecting the infrastructure sector, for example, natural disasters, operational disruption and national and local environmental laws.

The Fund will invest in specific themes or industries in line with the Fund's investment policy. These could underperform the broader market when compared to other funds that have a wider investment universe.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/06/2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 24 - 26 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.84%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

As the share class has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 30 October 2023.

This share class was launched on 30 October 2023.
