

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Boolers Balanced Fund A Shares

A Sub-fund of the IFSL Boolers OEIC (ISIN Income GB00BTWV0P81, Accumulation GB00BTWV0N67)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

Objective: The aim of the Fund is to increase the value of an investment over a minimum of 5 years. The Fund will do this through a combination of capital growth, which is profit on investments held, and income received by the Fund, which is money paid out of investments, such as dividends and interest.

Management style: The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when.

Policy: The Fund will invest at least 80% in collective investment schemes, investment trusts and exchange traded funds (collectively "Investment Funds"). This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the Fund will gain exposure to:

- Between 40% and 85% in shares in companies, across both developed and emerging markets, across different industries and geographical regions.
- Between 10% and 40% in bonds, which are loans typically issued by companies, governments and other institutions, and may be either investment grade, where the issuer has a high and reliable capacity to repay the debt, or sub-investment grade, which can be more vulnerable to changing market conditions but typically pay a higher rate of interest.
- Up to 20% of the Fund may be exposed indirectly to real assets, for example property and commodities (e.g. gold and oil), money market instruments, which are short term loans, and absolute return strategies, which aim to deliver positive returns in all market conditions.

The Fund will typically hold no more than 5% in cash, but may hold up to 20%, to enable the ready settlement of liabilities, for the efficient management of the portfolio or in pursuit of the Fund's investment objective. Whilst the Fund itself will

not use derivatives; the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

The Investment Manager, within the limits of the investment policy, aims to create a balanced blend of investments that together will increase in value over time, as well as limiting some of the potential for losses in times of market volatility. The Investment Manager considers a wide range of factors and styles when choosing to invest, such as geography, market capitalisation (the size and value of companies), developed versus emerging economies and management style. The Investment Manager follows a long-term strategic asset allocation, alongside a tactical approach to react to short term opportunities/risks. The Investment Manager determines the appropriate weightings for each Investment Fund based on the overall asset allocation positioning and taking into account their view of the market, the outlook for the future and potential risks for the Fund. The Investment Manager conducts rigorous analysis of the underlying Investment Funds, and continuously monitors their contribution to the portfolio's overall performance. The management of the Fund will be appropriate to the Fund's balanced risk profile so that any potential returns are balanced with appropriate risk taking.

Assessing performance: The Investment Association (IA), the trade body for UK investment managers, has created several 'sectors', as a way of dividing funds into broad groups with similar characteristics. The Fund's Investment Policy puts it in the IA Mixed Investment Sector 40-85%. The Fund is not managed to a benchmark, however you may want to assess the Fund's performance compared to the performance of this sector.

Other information: If you invest in income shares, income from investments in the Fund will be paid to you. If you invest in accumulation shares, income will be added to the value of your shares. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

Investments can go up and down in value and you could get back less than you put in.

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

Market risk: The Fund is exposed to financial markets, and market conditions can change rapidly and without warning.

Smaller company risk: The Fund may be exposed to shares of smaller companies, which are typically riskier and harder to sell in difficult market conditions, compared to larger, more established companies.

Emerging market risk: The Fund may be exposed to emerging markets (a fast-growing economy with increased global trade, but isn't yet considered fully developed). Investments in these countries can be more volatile and less

predictable than in more established markets, increasing risk.

Fixed income risk: The Fund will be exposed to bonds. The value of these investments can rise or fall due to factors including interest rates, inflation expectations and concerns about the borrower's ability to repay.

Foreign exchange (currency) risk: The Fund may be exposed to overseas markets and may be affected by changes in currency exchange rates.

Sub-investment grade bond risk: There is a greater chance that sub-investment grade bond issuers may not be able to pay income or repay the debt.

Liquidity risk: In difficult market conditions, the Fund may struggle to sell some investments at a fair price, or at all, due to reduced availability of buyers and sellers. This could reduce the Fund's value if investments cannot be sold at a fair price or may cause delays in getting your money back, when you want to sell.

Counterparty risk: The Fund relies on banks and other financial firms to carry out certain services. If one of these firms fails to meet its obligations, the Fund could lose money.

Operational risk: Failure in systems, people, or processes connected with the Fund's operation, including those related to the safekeeping of the Fund's investments, could lead to losses or inconvenience for investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

As this share class does not have 12 months accounting data the ongoing charges figure is based on estimated expenses. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 23 - 25 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	1.08%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up and you may get back less than you put in.

As the share class has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 3 March 2025.

This share class was launched on 3 March 2025.

Practical Information

If you wish to sell all or part of your investment please write to us at Investment Fund Services Limited, PO BOX 13586, Chelmsford, CM99 2GS or telephone 0808 178 9321. Your deal will be placed at the next valuation point after we receive your instruction.
