

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investment Fund Services

IFSL CleverIM Global Equity Fund Class C Shares

A Sub-fund of the IFSL CleverIM OEIC (ISIN Accumulation GB00BVZHP291)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

Objective: The aim of the Fund is to increase the value of an investment over a minimum of 5 years. The Fund will do this through a combination of capital growth, which is profit on investments held, and income received by the Fund, which is money paid out of investments, such as dividends and interest.

Management style: The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when.

Policy: At least 80% of the Fund will be exposed to shares of companies, also known as equities, listed globally.

Exposure to companies will typically be achieved by investing directly, but this exposure can also be indirect, through holding exchange traded funds (ETFs) and collective investment schemes (collectively "Investment Funds"). This may include Investment Funds managed or operated by the Authorised Corporate Director, the Investment Manager or one of their associates.

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund can use derivatives or forward transactions, which are instruments whose returns are linked to another asset, market or other variable factor, for efficient portfolio management purposes including the reduction of risk (hedging). The underlying Investment Funds purchased may also have the ability to use derivatives to varying degrees.

The Investment Manager follows a systematic, process-driven approach to

determine both the amount allocated to each region globally as well as the individual stocks within each regional allocation. A systematic investment approach uses clearly defined rules and processes that are applied consistently over time. This approach aims to minimise the effect of human biases within the investment process.

Within each region, the Fund invests in a diversified selection of equities identified through a data-driven screening process that evaluates recent performance and risk characteristics.

As part of its risk-management approach, there may be times where the Investment Manager replaces a region's direct equity holdings with Investment Funds that are passively managed (where an investment aims to replicate the performance of a specific market index) if performance declines materially within that regional allocation. These Investment Funds may be held until conditions within the relevant regional equity market have improved.

Assessing performance: The Investment Association (IA), the trade body for UK investment managers, has created several 'sectors', as a way of dividing funds into broad groups with similar characteristics. The Fund's Investment Policy puts it in the IA Global Sector.

The Fund is not managed to a benchmark; however you may want to assess the Fund's performance compared to the performance of this sector. This comparator has been chosen as it represents other funds with a similar asset allocation.

Other information: Income is not distributed but is rolled up (accumulated) into the value of your investment. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

Investments can go up and down in value and you could get back less than you put in.

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

Market risk: The Fund is exposed to financial markets, and market conditions can change rapidly and without warning.

Smaller company risk: The Fund may be exposed to shares of smaller companies, which are typically riskier and harder to sell, compared to larger, more established companies.

Emerging market risk: The Fund may be exposed to emerging markets (a fast-growing economy with increased global trade, but isn't yet considered

fully developed). Investments in these countries can be more volatile and less predictable than in more established markets, increasing risk.

Foreign exchange (currency) risk: The Fund will be exposed to overseas markets and may be affected by changes in currency exchange rates.

Liquidity risk: In difficult market conditions, the Fund may struggle to sell some investments at a fair price, or at all, due to reduced availability of buyers and sellers. This could reduce the Fund's value if investments cannot be sold at a fair price or may cause delays in getting your money back, when you want to sell.

Counterparty risk: The Fund relies on banks and other financial firms to carry out certain services. If one of these firms fails to meet its obligations, the Fund could lose money.

Derivative risk: The Fund may use financial contracts (known as derivatives) to manage risks, reduce costs, or improve returns. However, these strategies may not work as intended.

Operational risk: Failure in systems, people, or processes connected with the Fund's operation, including those related to the safekeeping of the Fund's investments, could lead to losses or inconvenience for investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

As this share class does not have 12 months accounting data the ongoing charges figure is based on estimated expenses. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 24 - 26 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.41%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up and you may get back less than you put in.

As the Fund has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 17 August 2026.

This share class launched on 17 August 2026.
