

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Evenlode Global Income Class B EUR Shares

A Sub-fund of the IFSL Evenlode Investment Funds ICVC (ISIN Income GB00BF1QND54, Accumulation GB00BF1QN913)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of an investment over a minimum period of 5 years. The Fund will do this through a combination of income received and capital growth, with an emphasis on income. Income received is money paid out of the Fund's investments, such as dividends. Capital growth is the increase in the value of investments over time.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when.

At least 80% of the Fund will be invested directly in shares of companies listed on a range of global stock exchanges. The Fund may also invest directly in the shares of companies listed globally, and up to 10% in other funds. The Fund may hold up to 20% in cash and cash equivalents.

The Fund may invest in derivatives to reduce risk or cost or to generate additional capital or income at a level consistent with the risk profile of the Fund (known as "Efficient Portfolio Management").

The Investment Manager seeks to deliver the Fund's objectives through investing in companies that can generate and grow (compound) cash flows sustainably over a long period of time. These companies generate high cash flows relative to the size of their asset base and as such, are commonly termed "asset-light". Typically, they don't need to invest a large amount of cash to refresh their underlying asset base and are therefore not "capital intensive". The ability of each company to maintain high returns over time is assessed on a range of factors, including structural market growth, durable competitive advantage, reinvestment in growth and prudent levels of borrowing.

The Investment Manager balances the potential return on investment in these

companies against the risks faced by each company, including Environmental, Social and Governance (ESG) factors. The Investment Manager will engage with all companies to encourage them to make improvements to their management of ESG risks. We recommend reading this information alongside the Fund's Sustainability Disclosure. This will help you understand further how sustainability is considered within the Fund's investment approach. You can find the Sustainability Disclosure at www.ifslfunds.com.

Shareholders may wish to compare the performance of the Fund against the MSCI World Index (GBP). The index is a broadly based global index which includes a wide range of companies across large and mid-cap market capitalisations which is consistent with the share selection process. The shares comprising the index are aligned with the Fund's global developed market focus, and on that basis the index is considered an appropriate performance comparator for the Fund. Please note the Fund is not constrained by or managed to the index.

Shareholders may also wish to compare the Fund's performance against other funds within the IA's Global Equity Income sector as this will provide an indication of how the Fund is performing compared to its peers in that sector. As the sector aligns with the Fund's asset allocation and income delivery objectives, it is considered an appropriate performance comparator for the Fund.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your

investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund will have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/08/2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund retail scheme when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 7 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.84%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Historic performance to 31 December 2023

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
Fund	-	-	-	-	0.6	31.0	-2.1	31.7	-11.4	10.9
Benchmark	-	-	-	-	-3.0	22.7	12.3	22.9	-7.8	16.8
Benchmark 2	-	-	-	-	-5.7	18.9	3.4	18.9	-1.1	9.3

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 20 November 2017.

This share class was launched on 20 November 2017.

Benchmark: MSCI World Index GBP.

Benchmark 2: IA Global Equity Income.
