

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# IFSL James Hambro Barnham Broom Fund

A Sub-fund of the IFSL James Hambro Umbrella Fund (ISIN Income: GB00B89TDK40) (ISIN Accumulation: GB00B8FG1724)

This Fund is managed by Investment Fund Services Limited (IFSL)

## Objectives and Investment Policy

The aim of the Fund is to grow the value of your investment over a period of at least 5 years, through both capital growth, which is profit on investments, and income, which is money paid out from an investment, such as interest and dividends.

The Fund will invest in a broad range of asset classes and investments across different industries and geographical regions, however not all assets classes may be held at all times. This will include:

- 40% to 85% in shares in companies.
- Up to 35% in bonds and loans issued by governments, supra-national organisations and companies.
- Up to 30% in real assets such as property, infrastructure and commodities (e.g. gold and raw materials).
- Up to 40% in cash.

These asset classes may be held directly (although the Fund will not invest directly in real assets), through other funds (which could include other funds managed by the Authorised Corporate Director or the Investment Manager), exchange traded funds, exchange traded contracts, investment trusts, or structured products, which are securities whose returns are linked to underlying assets or markets.

The Fund may also invest in preference shares, bonds which may be converted into shares (known as convertible bonds) and money market instruments, which are shorter term loans.

The Fund can use derivatives or forward transactions to manage currency

exposure and for efficient portfolio management. The Fund will not always hold these, however at times they may be held for extended periods. The use of derivatives is not expected to have a significant impact on the risk profile of the Fund. Any underlying funds held within this Fund may also use derivatives to varying degrees.

The Fund is actively managed, which means the Investment Manager decides which investments to buy and when. Investments selected are based on those the Investment Manager believes will deliver returns consistent with the overall investment objective.

The Investment Manager will decide the proportion of the fund to be held in each asset class, aiming to achieve a balance which appears most likely to deliver returns consistent with the overall investment objective. This decision, at any given time, will be influenced by the Investment Manager's view of current economic and other circumstances.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund will be in the IA Mixed Investment 40-85% shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

## Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived

credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

The Fund's cash may be deposited with various financial institutions. The Fund may suffer a loss if these institutions fail to make its payments or become insolvent.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/09/2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 26 - 29 of the Fund's Prospectus, which is available at [www.ifslfunds.com](http://www.ifslfunds.com).
