

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investment Fund Services

IFSL Magnus Max 85% Equity Fund X Shares

A Sub-fund of the IFSL Magnus OEIC (ISIN Accumulation: GB00BSLNS877)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of an investment over a minimum of 5 years. The Fund will do this through a combination of capital growth, which is profit on investments held, and income received by the Fund, which is money paid out of investments, such as dividends and interest.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when.

The Fund will invest at least 80% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs, (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director, the Investment Manager or one of their associates.

Through these Investment Funds, the Fund will gain exposure to:

- Between 40% and 85% in shares in companies, also known as equities, normally between 75-85%.
- Up to 60% in bonds, which are loans typically issued by companies, governments and other institutions, cash or money market instruments (which are short term loans), normally between 5-25%.
- Up to 20% in alternative asset types, such as infrastructure, commodities (e.g. gold and oil), property, and absolute return funds (which aim to deliver positive returns in all market conditions), normally below 15%.

The exposure to the shares in companies and bonds above may also be achieved through direct investment, however this will be limited to 20% of the Fund.

The Fund may also hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the Fund's investment objective.

The Fund may use derivatives, which are instruments whose returns are linked to

another asset, market or other variable factor. These may be used to help reduce risk in the Fund for efficient portfolio management purposes (also known as hedging). The Fund may not always hold these instruments, however at times, they may be held for extended periods. Additionally, Investment Funds purchased may have the ability to use derivatives to varying degrees.

The Investment Manager, within the limits of the investment policy, aims to create a blend of investments, that together will increase in value over time, as well as limit the potential for losses in times of market volatility. The Investment Manager considers a wide range of factors when choosing to invest, such as company credit risk, geography, company size, industry sector and the investment style of Investment Funds. The Investment Manager then selects the Investment Funds or direct investments to create a portfolio based on their:

- long-term view of the risk, return and other characteristics of the investment;
- insight and views on short term opportunities to enhance returns or mitigate risks within the Fund; and
- assessment of the capabilities of the managers of the Investment Funds.

The Investment Association (IA), the trade body for UK investment managers, has created several 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund is in the IA Mixed Investment 40-85% Shares Sector. The Fund is not managed to a benchmark, however you may want to assess the Fund's performance compared to the performance of this sector.

The IA Mixed Investments 40-85% Shares Sector has been chosen as the Fund's investment policy is broadly consistent with the sector's typical asset allocation.

Income is not distributed but is rolled up (accumulated) into the value of your investment. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a

smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund will be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

As this share class does not have 12 months accounting data the ongoing charges figure is based on estimated expenses. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.57%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

As the Fund has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 7 July 2025.

This share class was launched on 7 July 2025.
