

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Marlborough Extra Income Fund Class P Units

(ISIN Income GB00B8DGH325, Accumulation GB00BR54GL80)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to deliver a greater income than the average of the FTSE All Share Index over any 3-year period whilst taking less risk, after any charges have been taken out of the Fund. The Fund also aims to deliver capital growth, that is to increase the value of your investment, over a period of 5 or more years. There is no certainty that either aim of the Fund will be achieved.

The Fund is actively managed which means the Investment Manager decides which investments to buy or sell, and when.

The Investment Manager will aim to maintain volatility of the Fund (a measure of the size of short term changes in value) below 80% of the volatility of the FTSE All Share Index over any three year period.

The Fund will invest between 70% and 85% in the shares of companies and investment trusts.

The Fund may also invest up to 30% in bonds, which are loans issued by companies and other institutions. Bonds will typically be investment grade, which are issued by entities that have a high capacity to repay the debt, but it may occasionally hold sub-investment grade bonds as a result of changes to existing holdings.

At least 80% of the Fund will be invested in the shares of companies listed, incorporated or headquartered in the UK and bonds denominated in GBP.

The Fund may also invest in companies which are listed on overseas stock exchanges, other securities which offer returns linked to the company performance, such as warrants, preference shares and convertible bonds.

The Fund may, from time to time, hold shares in companies that become unquoted following investment, due to a delisting or other corporate event, for example. The Fund will not make any new investments into the shares of companies that are unquoted.

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities

(including the redemption of units), for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

Whilst the Fund itself will not use derivatives, the underlying Funds purchased may have the ability to use derivatives to varying degrees.

The Fund seeks to achieve its objective through a diversified allocation of asset classes within the scope of the investment policy. The asset allocation between shares and bonds is primarily driven by security specific analysis, but macroeconomic analysis is also considered. The Investment Manager seeks to invest in companies with sound fundamentals such as strong financial statements, with regular income payments being a key factor. The Investment Manager assesses companies against three themes for investment, those being:

- Growth - meaning a company is expected to grow its earnings consistently
- Compound - meaning a company has the ability to grow through repeated reinvestment of additional earnings
- Recovery - meaning the price of a company is expected to rebound following a period of underperformance.

The Investment Manager will have a bias towards holding investment grade bonds issued by both companies and governments. The bond holdings within the portfolio are intended to reduce volatility, which refers to the amount by which an investment's value can rise and fall, and complement the income generation from companies held by the Fund.

We have chosen a performance target for the Fund, which is to pay an income in excess of that of the FTSE All Share Index over any three year accounting period whilst also maintaining a lower level of volatility.

The Fund's investment policy put it in the IA Mixed Investment 40-85% Shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation units which means income is invested back into the Fund and reflected in the price of your units.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this unit class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund will invest mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 20/10/2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 15 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Historic performance to 31 December 2023

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this unit class is calculated in GBP.

The Fund was launched on 1 August 1995.

This Unit Class was launched on 31 December 2012.
