

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Marlborough Global Essential Infrastructure Fund Class I Shares

A Sub-fund of the IFSL Marlborough No2 OEIC (ISIN Accumulation GB00BN4HRN92)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

Objective: The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, as well as to provide income, that is, money paid out from an investment as dividends from shares, over a minimum of 5 years. However, there is no certainty this will be achieved.

Management style: The Fund is actively managed which means the Investment Manager decides which investments to buy or sell, and when.

Policy: The Fund will invest at least 80% in the shares of global infrastructure companies, including investment companies and investment trusts, listed on a range of global developed and emerging market stock exchanges. Exposure to emerging markets will be limited to 10% of the Fund with all other exposure having no maximum or minimum to any market or geographical region.

The Fund invests in a focused manner, which means the Fund will generally hold a concentrated portfolio of between 25 and 45 listed companies.

The Investment Manager seeks to invest in global infrastructure companies that have assets that are "essential" for the basic functioning of a society, such as regulated utilities (eg electricity, gas and water), transport (eg toll roads, airports), energy (eg regulated or contracted pipelines) and communications (eg mobile phone towers).

The Fund may, from time to time, hold shares in companies that become unquoted following investment, due to a delisting or other corporate event, for example. The Fund will not make new investment into the shares of companies that are unquoted.

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities (including the redemption of units), for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund will not invest in derivatives.

The Investment Manager reviews financial publications, available broker opinions and talks to the directors and/or management of the companies that are within the scope of the investment policy, to form views on which companies are suitable for buying and selling.

The Investment Manager will assess the appropriate weightings for each sector and company based on their view of the market and outlook for the future.

The Investment Manager aims to exploit the inefficiencies within the global listed infrastructure universe by conducting thorough research and analysis which considers the overall quality and long-term cash flow valuation of a company.

Assessing performance: The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Infrastructure sector. You may want to assess the Fund's performance compared to the performance of this sector.

Other information: Income is not distributed but is rolled up (accumulated) into the value of your investment. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

Investments can go up and down in value and you could get back less than you put in.

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

Market risk: The Fund is exposed to financial markets, and market conditions can change rapidly and without warning.

Smaller company risk: The Fund may be exposed to shares of smaller companies, which are typically riskier and harder to sell in difficult market conditions, compared to larger, more established companies.

Emerging market risk: The Fund may be exposed to emerging markets (a fast-growing economy with increased global trade, but isn't yet considered fully developed). Investments in these countries can be more volatile and less predictable than in more established markets, increasing risk.

Foreign exchange (currency) risk: The Fund will be exposed to overseas markets

and may be affected by changes in currency exchange rates.

Concentration risk: The Fund holds a smaller number of investments, meaning changes in the value of a single holding can have a bigger impact on the Fund's performance than a more diversified portfolio.

Infrastructure risk: The Fund invests in infrastructure-related companies. These investments can be affected by events such as natural disasters, operational disruptions, or changes in national and local environmental laws.

Liquidity risk: In difficult market conditions, the Fund may struggle to sell some investments at a fair price, or at all, due to reduced availability of buyers and sellers. This could reduce the Fund's value if investments cannot be sold at a fair price or may cause delays in getting your money back, when you want to sell.

Counterparty risk: The Fund relies on banks and other financial firms to carry out certain services. If one of these firms fails to meet its obligations, the Fund could lose money.

Operational risk: Failure in systems, people, or processes connected with the Fund's operation, including those related to the safekeeping of the Fund's investments, could lead to losses or inconvenience for investors.

Income risk: Companies may reduce or stop paying dividends, which could reduce the income you receive from the fund.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/01/2026. This share class is benefiting from expense funding whereby some of the charges outlined in the prospectus have been fully or partially funded. Without this expense funding it is anticipated the OCF would be higher and potentially to the extent of having a noticeable impact on the returns investors receive. The expenses will continue to be funded until the Fund grows to a size able to support the OCF quoted on this KIID. When this expense funding ceases if the OCF is expected to increase by an amount greater than 5% of its current value, Investment Fund Services Limited will give investors 60 days' written notice. This figure may vary from year to year. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23-25 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.65%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up and you may get back less than you put in.

As the share class has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 20 September 2022.

This Unit Class was launched on 30 June 2026.

Practical Information
