

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Marlborough High Yield Fixed Interest Fund Class P Units

(ISIN Income GB00B8L7D393, Accumulation GB00BR54GM97)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide income, that is, money paid out from an investment as interest, with the potential for some capital growth, that is, to increase the value of your investment, over a period of five or more years, after any charges have been taken out of the Fund, however, there is no certainty this will be achieved.

The Fund is actively managed which means the Investment Manager decides which investments to buy or sell, and when.

At least 80% of the Fund will be invested in high yield bonds issued by companies and institutions. These will be sub-investment grade or unrated bonds, which are loans issued by entities which can be more vulnerable to changing market conditions that typically pay higher rates of interest than investment grade bonds.

The Fund may also invest in investment grade bonds, bonds issued by governments, bonds which may be converted into shares (known as convertible bonds), preference shares, permanent interest-bearing shares and money market instruments (short term loans typically issued by governments and corporations). Whilst the Fund will not buy shares in companies there may be times where the Fund holds shares following a restructuring of an existing holding.

The Fund may hold up to 20% in cash however will typically hold less than 5%. This is to enable the ready settlement of liabilities (including the redemption of units), for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

Whilst there is no minimum or maximum exposure to any geographical region, the Investment Manager uses the ICE Bank of America Merrill Lynch European Currency High Yield Constrained (hedged to sterling) Index as a reference point when constructing the portfolio and for risk management purposes, which means the Fund has a bias towards European bonds.

The Fund uses derivatives (instruments whose returns are linked to another asset, market or other variable factor) and forward transactions linked to exchange rates, for the purposes of efficient portfolio management in order to reduce currency risk in the Fund, also known as hedging.

The Investment Manager aims to identify and invest in a selection of high yield bonds that will perform well on both their own merit and in consideration to the wider economic outlook. In doing this, the Investment Manager undertakes fundamental credit analysis of individual bonds, focusing on the issuer's ability to generate cash flows to meet their bond interest payments. This is known as bottom-up investing. Simultaneously, the Investment Manager assesses macroeconomic and geopolitical factors to identify opportunities and risks across the investible universe. This is known as top-down investing. The investment process is research intensive and uses fundamental analysis of each individual security to create a portfolio tailored to the overall economic environment.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Sterling High Yield sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation units which means income is invested back into the Fund and reflected in the price of your units.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this unit class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund will be exposed to bonds, the prices of which will be impacted by factors including: changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can

be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/06/2024. This share class has benefited from expense funding whereby some of the charges outlined in the prospectus have been fully or partially funded. Without this expense funding it is anticipated the OCF would be higher and potentially to the extent of having a noticeable impact on the returns investors receive. When this expense funding ceases if the OCF is expected to increase by an amount greater than 5% of its current value, Investment Fund Services Limited will give investors 60 days' written notice. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 15 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.67%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2023

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
■ Fund	2.5	4.6	7.6	7.8	-3.9	10.7	4.4	4.1	-10.1	15.2
■ Benchmark	2.0	0.0	11.2	6.3	-3.6	11.4	3.5	4.2	-9.8	10.9

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this unit class is calculated in GBP.

The Fund was launched on 29 November 2004.

This Unit Class was launched on 31 December 2012.

Benchmark: IA £ High Yield.
