

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Marlborough Multi-Cap Growth Fund Class P Units

(ISIN Income GB00B8CQP956, Accumulation GB00BR54GN05)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your investment over a minimum of 5 years. The Fund also aims to outperform the FTSE All-Share Index over any 5 year period after charges. There is no certainty that either aim of the fund will be achieved.

The Fund is actively managed which means the Investment Manager decides which investments to buy or sell, and when.

The Fund will invest at least 80% in the shares of companies and investment trusts listed on UK stock exchanges. This will include a range of small, medium and large companies.

The Fund may also invest up to 20% in the shares of companies which are listed on overseas stock exchanges.

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities (including the redemption of units), for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund will not invest in derivatives.

The Investment Manager aims to identify a portfolio of UK companies with a sustainable competitive advantage that can capture market share, enabling them to maintain growth across market cycles.

These competitive advantages may include factors such as scalability, product differentiation, strong management, established branding, effectiveness of sales and distribution, and a strong balance sheet.

The Investment Manager looks to invest in a mix of UK companies of varying sizes and sectors. Preference is given to sectors experiencing long-term growth trends.

Where opportunities are limited in the UK, the Investment Manager may include

some overseas companies.

The performance target is the level of performance the Fund aims to deliver, however, there is no certainty this will be achieved. The FTSE All-Share Index has been chosen as the performance target as the composition of the index is broadly similar to the holdings in the Fund.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA UK All Companies sector. You may want to assess the Fund's performance compared to the performance of this sector.

Investors should note that whilst the IA UK All Companies sector is representative of the general nature of the Fund, the sector also contains other funds investing across the market capitalisation spectrum from large companies to small companies. Whilst the Fund invests in a range of small, medium and large companies, the Fund is likely to have a greater weighting to shares of smaller companies than both the average fund in the sector and the index. When shares of larger companies are performing better than shares of smaller companies the Fund is more likely to underperform the sector and index. Conversely, the Fund is more likely to outperform when shares of smaller companies perform better than shares of larger companies.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation units which means income is invested back into the Fund and reflected in the price of your units.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this unit class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund will be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise,

resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund will invest mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 20/09/2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 15 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.82%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Historic performance to 31 December 2023

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
■ Fund	2.6	15.6	10.0	28.7	-17.4	29.2	9.1	17.8	-26.4	15.5
■ Benchmark	1.2	1.0	16.8	13.1	-9.5	19.2	-9.8	18.3	0.3	7.9
■ Benchmark 2	0.9	5.0	11.0	14.1	-11.2	22.4	-6.2	17.1	-9.2	7.4

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this unit class is calculated in GBP.

The Fund was launched on 3 July 1995.

This Unit Class was launched on 31 December 2012.

Benchmark: FTSE AllSh TR GBP.

Benchmark 2: IA UK All Companies.
