

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Titan Absolute Return Fund A Shares

A Sub-fund of the IFSL Titan NURS OEIC (Accumulation GB00BTWTL155)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of your investment by more than 1% above cash per year, net of fees, over any rolling 3-year period. Cash is measured by the Bank of England's interest rate benchmark, SONIA. The increased value comes from a combination of income, which is money paid out of investments such as interest from bonds, and capital growth, which is profit on investments held. Capital invested in the Fund is at risk and there is no guarantee that a positive return will be achieved over any rolling 3 year or other period.

The Fund is actively managed which means the Investment Manager decides which investments to buy or sell, and when.

The Fund will invest at least 80% in collective investment schemes, investment trusts and exchange traded funds (ETF's) (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director, the Investment Manager or one of their associates.

Through these Investment Funds, the Fund will gain exposure to a range of absolute return strategies that the Investment Manager believes has the potential to deliver positive returns in all market conditions through exposure to a broad range of asset classes.

The Fund may also hold up to 20% directly in other asset types such as: Bonds and loan notes – these are loans typically issued by companies, governments, and other institutions. They may be either investment grade, where the issuer has a high and reliable capacity to repay the debt, or sub-investment grade, which are riskier and more vulnerable to changing market conditions; and Commodities (e.g. gold and oil) – through exchange traded commodities (ETCs).

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities,

for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund can use derivatives or forward transactions, which are instruments whose returns are linked to another asset, market or other variable factor. These may be used to help meet the Fund's objective, or for efficient portfolio management purposes, including the reduction of risk (hedging). The underlying funds held may also use derivatives to varying degrees.

The Investment Manager aims to construct a portfolio that delivers the target return by combining various strategies and assets specifically chosen to minimise correlation to shares and bonds and which, in their view, has the potential for positive returns in all market conditions. To achieve this the Investment Manager assesses historical data and tests the portfolio under different scenarios to ensure the portfolio remains uncorrelated to traditional shares and bonds and therefore providing the opportunity to meet the objective. The Investment Manager will conduct rigorous analysis of the Investment Funds and other assets, continually monitoring their contribution to the overall performance of the Fund.

The performance target is the level of performance the Investment Manager aims to deliver. However, returns will fluctuate, and it will not necessarily be achieved over every 3 year period. This target is to generate returns 1% in excess of cash each year, over any rolling 3 years. The Fund is traded in sterling (GBP) and therefore SONIA, the Bank of England's sterling overnight interest rate for cash deposits, +1% is the most appropriate target benchmark for this Fund.

Income is not distributed but is rolled up (accumulated) into the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 3 because its investments have experienced low to moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets, to reduce the costs of investing or for investment purposes. There is however a risk that the desired result may not be achieved or may result in gains or losses greater than the amount originally invested.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

As this share class does not have 12 months accounting data the ongoing charges figure is based on estimated expenses. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 26 - 29 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	1.34%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

As the share class has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 07 February 2025.

This share class was launched on 07 February 2025.
