

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Titan Square Mile UK Equity Fund Class X Shares

A Sub-fund of the IFSL Titan NURS OEIC (Accumulation GB00BS1J9711)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase in value, over a minimum of 5 years, through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments such as dividends from shares.

The Fund is actively managed which means the Investment Manager decides which investments to buy or sell, and when.

At least 80% of the Fund will be exposed to shares of UK companies, also known as equities, which are those domiciled in, incorporated in, or that have significant operations/economic exposure to the UK. Exposure to UK companies can be indirect, through holding other funds, investment trusts, and exchange traded funds (ETFs), or by investing directly (as detailed in the investment strategy). The Fund can use a combination of indirect and direct investments, and at times exposure could be through a combination of both. The Fund may have exposure to shares of companies of varying sizes, from large to small companies. The exposure to small companies (often higher risk) may, at times, be significant.

The Fund may also have exposure of up to 20% of the Fund in shares of non-UK companies, along with other asset types, such as bonds (which are loans typically issued by companies, governments, and other institutions), warrants, and money market instruments (short-term loans typically issued by governments and corporations).

The Fund may hold units/shares in other funds (which could include other funds managed by the Authorised Corporate Director, the Investment Managers or one of their associates).

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund can use derivatives or forward transactions, instruments whose returns are linked to another asset, market or other variable factor, in order to meet the Fund's objective (also known as investment purposes), or for efficient portfolio management purposes including the reduction of risk (hedging). The funds held may also use derivatives to varying degrees.

The Investment Manager appoints the Investment Adviser to assist them in delivering the investment strategy; together they conduct rigorous due diligence on the fund managers of funds that are within the scope of the investment policy. The Investment Manager will use this information to form views on which funds are suitable for buying and selling, based on both their view of the market and outlook for the future. Where beneficial to the Fund, the Investment Manager may decide to work with the fund manager of an underlying fund to run a segregated mandate. That means the external fund manager manages a part of the Fund directly, typically mirroring an existing fund they manage. This will result in exposure to investments directly rather than via an underlying fund. There is no fixed or targeted allocation between underlying funds and direct investments via a segregated mandate, meaning the Fund's allocation could vary from 0% to 100% for either approach at any time.

The Fund's investment policy puts it in the IA UK All Companies sector. The Fund is not managed to a benchmark. You may want to assess the Fund's performance compared to the performance of this sector.

Income is not distributed but is rolled up (accumulated) into the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived

credit quality.

The Fund will invest mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets, to reduce the costs of investing or for investment purposes. There is however a risk that the desired result may not be achieved or may result in gains or losses greater than the amount originally invested.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

As this share class does not have 12 months accounting data the ongoing charges figure is based on estimated expenses. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 26 - 29 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.62%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

As the share class has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 05 December 2024.

This share class was launched on 05 December 2024.
