

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL YOU Multi-Asset Blend Growth Fund Class B Shares

A Sub-fund of the IFSL YOU Asset Management Funds (ISIN Accumulation: GB00BTQM1Y31)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The objective of the Fund is to increase the value of an investment over a minimum of 5 years, through a combination of capital growth, which is profit on an investment and income, which is money paid out from an investment such as interest and dividends.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when, and will invest at least 80% in other collective investment schemes, investment trusts and exchange traded funds (collectively "Investment Funds"). This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these investments, the Fund will have exposure to:

- Between 70% - 90% in UK and international shares in companies, any exposure above 85% will only be temporary
- Up to 30% in bonds
- Up to 10% in real assets e.g. property and commodities, for example gold
- Up to 15% in absolute return funds (funds which have an objective of providing positive performance in a variety of market conditions).

Strategic asset allocation decisions will be taken based on the long term views of the Investment Manager and as such investors should expect broad changes to be gradual.

Whilst the Fund itself will not use derivatives, the Investment Funds purchased

may have the ability to use derivatives to varying degrees.

In addition to the above, the Investment Funds may also hold other permitted investments such as money market instruments and securities whose returns are linked to other assets, although this is expected to be minimal.

The Fund can hold up to 20% in cash and cash funds.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Mixed Investment 40-85% shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

However, please note that the Fund is not managed to align with the sector, meaning the Fund's performance can differ when compared to the average of the IA Mixed Investment 40-85% shares sector. As an example, when stock markets are falling and other funds within the sector have reduced their holding in company shares below 70%. The Fund's investment policy imposes at least 70% be held in company shares at all times.

Income from investments is not paid out but is added to the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a

smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. These charges are estimated because from 1st November 2024 the Fund reached a size that a discount could be applied. The Fund's annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23 - 25 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.65%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

As the share class has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 1 July 2019.

This share class was launched on 29 September 2025.
