Time Period: 01/12/2019 to 30/11/2024

**This information is for Professional Clients only and should not be relied upon by Retail Investors.**

Past performance is not a reliable indicator of future performance. Investments and the income derived from them can fall as well as rise and the investor may not get back the amount originally invested.

### Risk Warnings

Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting portfolios. Investments may include emerging market, smaller company and commodity funds which may be higher risk than other asset classes. Investments in fixed interest funds are subject to market and credit risk and will be impacted by changes in interest rates. Changes in exchange rates may affect the value of the underlying investments. Investments in Property funds carry specific risks relating to liquidity. Property funds can go through periods, known as 'gating', when it may not be possible to trade in or out of the funds and to access your money during such periods. The portfolios may invest a large part of their assets in funds for which investment decisions are made independently of the portfolios. If these investment managers perform poorly, the value of the portfolios is likely to be adversely affected. Investment in funds may also lead to additional fees arising from holding these funds.
