IFSL ASCOT LLOYD OEIC

AUTHORISED STATUS

IFSL Ascot Lloyd OEIC (the Company) is an open-ended investment company (OEIC) with variable capital incorporated under the Open-Ended Investment Companies Regulations 2001 (OEIC Regulations). The Company is a non-UCITS Retail Scheme as defined in the Collective Investment Schemes Sourcebook (COLL) and the Investment Funds Sourcebook (FUND) and is also an umbrella company for the purposes of the OEIC Regulations. The Company is incorporated in England and Wales with registered number IC001126. The Company was authorised by an order made by the FCA with effect from 12 October 2018 with the Product Reference Number (PRN) 816795.

The Company currently has ten sub-funds: IFSL Ascot Lloyd 3; IFSL Ascot Lloyd 4; IFSL Ascot Lloyd 5; IFSL Ascot Lloyd 6; IFSL Ascot Lloyd 7; IFSL Ascot Lloyd 8; IFSL Ascot Lloyd Passive Focus 4; IFSL Ascot Lloyd Passive Focus 5; IFSL Ascot Lloyd Passive Focus 6; and IFSL Ascot Lloyd Passive Focus 7.

Shareholders of the sub-funds do not have any proprietary interest in the underlying assets of the Company and will not be liable for the debts of the Company. A sub-fund is not a legal entity. If the assets attributable to a sub-fund were insufficient to meet its liabilities the shortfall will not be met out of the assets attributable to one or more other sub-funds of the Company. The sub-funds are segregated by law under the Protected Cell Regime.

GENERAL INFORMATION

Important Information

Avellemy Limited, which is the investment manager with day-to-day responsibility for managing the funds' investments, changed its name to Ascot Lloyd Investment Management Limited.

On 1 July 2025, the name of the OEIC and the six existing sub-funds' were changed as follows:

Current	New
IFSL Avellemy OEIC	IFSL Ascot Lloyd OEIC
IFSL Avellemy 3	IFSL Ascot Lloyd 3
IFSL Avellemy 4	IFSL Ascot Lloyd 4
IFSL Avellemy 5	IFSL Ascot Lloyd 5
IFSL Avellemy 6	IFSL Ascot Lloyd 6
IFSL Avellemy 7	IFSL Ascot Lloyd 7
IFSL Avellemy 8	IFSL Ascot Lloyd 8

On 22 September 2025, the four new Passive Focus Funds were launched: IFSL Ascot Lloyd Passive Focus 4; IFSL Ascot Lloyd Passive Focus 5; IFSL Ascot Lloyd Passive Focus 6; and IFSL Ascot Lloyd Passive Focus 7.

The four new Passive Focus Funds have adopted an extended first accounting period ending 31 January 2027. Therefore, these sub-funds are not presented within the 31 January 2026 annual report and audited financial statements of IFSL Ascot Lloyd OEIC.

Up to date Key Investor Information Documents, Prospectus and Long Reports and Financial Statements for any fund within the ACD's range, can be requested by the investor at any time.

IFSL Ascot Lloyd 3

Investment objective

The investment objective of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '3'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

IFSL ASCOT LLOYD OEIC

GENERAL INFORMATION

IFSL Ascot Lloyd 3 (continued)

Investment policy (continued)

Through these Investment Funds, the sub-fund is likely to be exposed to a higher percentage of lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund will have lower exposure to higher-risk asset types such as shares in companies.

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

Investment strategy

The sub-fund's investments are low risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- assessment of the capabilities of the manager of the Investment Fund; and
- view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Mixed Investment 0-35% shares sector. The sub-fund is not managed to a benchmark, however you may want to assess the sub-fund's performance compared to the performance of this sector.

IFSL Ascot Lloyd 4

Investment objective

The investment objective of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '4'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

IFSL Ascot Lloyd 4 (continued)

Investment policy

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the sub-fund is likely to be exposed to a higher percentage of lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund will have lower exposure to higher-risk asset types such as shares in companies.

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

Investment strategy

The sub-fund's investments are low risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- assessment of the capabilities of the manager of the Investment Fund; and
- view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Mixed Investment 20-60% shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

IFSL Ascot Lloyd 5

Investment objective

The investment objective of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '5'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

IFSL ASCOT LLOYD OEIC

GENERAL INFORMATION

IFSL Ascot Lloyd 5 (continued)

Investment objective (continued)

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the sub-fund is likely to be exposed to a mix of lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund will have exposure to higher-risk asset types such as shares in companies.

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

Investment strategy

The sub-fund's investments are low to medium risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- assessment of the capabilities of the manager of the Investment Fund; and
- view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Mixed Investment 40-85% shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

Please note both IFSL Ascot Lloyd 5 and IFSL Ascot Lloyd 6 use the IA Mixed Investment 40-85% shares sector as a comparison benchmark however IFSL Ascot Lloyd 5 is a lower risk fund. Investors should be considerate of the different risk profiles when comparing performance against the benchmark and reaching a conclusion on its return (which is the money made or lost on an investment). Over the longer-term, lower risk profile funds would be expected to be less volatile and as a result potentially deliver a reduced return versus a higher risk alternative.

IFSL ASCOT LLOYD OEIC

GENERAL INFORMATION

IFSL Ascot Lloyd 6

Investment objective

The investment objective of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '6'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. IFSL ASCOT LLOYD OEIC

GENERAL INFORMATION

IFSL Ascot Lloyd 7 (continued)

Investment strategy (continued)

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Flexible Investment sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

Please note both IFSL Ascot Lloyd 7 and IFSL Ascot Lloyd 8 use the IA Flexible Investment sector as a comparison benchmark however IFSL Ascot Lloyd 7 is a lower risk fund. Investors should be considerate of the different risk profiles when comparing performance against the benchmark and reaching a conclusion on its return (which is the money made or lost on an investment). Over the longer-term, lower risk profile funds would be expected to be less volatile and as a result potentially deliver a reduced return versus a higher risk alternative.

From time to time, due to the nature of the IA Flexible Investment sector, the sub-fund may have an asset allocation which is different to the average of the sector. This variable nature of the sector should be taken into consideration when comparing the performance of the sub-fund.

IFSL Ascot Lloyd 8

Investment objective

The investment objective of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '8'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the sub-fund is likely to be exposed to a higher percentage of higher-risk asset types such as shares in companies.

The sub-fund will have lower exposure to lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

IFSL ASCOT LLOYD OEIC

GENERAL INFORMATION

IFSL Ascot Lloyd 8 (continued)

Investment strategy

The sub-fund's investments are high risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- assessment of the capabilities of the manager of the Investment Fund; and
- view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Flexible Investment sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

Please note both IFSL Ascot Lloyd 7 and IFSL Ascot Lloyd 8 use the IA Flexible Investment sector as a comparison benchmark however IFSL Ascot Lloyd 8 is a higher risk fund. Investors should be considerate of the different risk profiles when comparing performance against the benchmark and reaching a conclusion on its return (which is the money made or lost on an investment). Over the longer-term, higher risk profile funds would be expected to be more volatile and as a result potentially deliver a higher return versus a lower risk alternative.

From time to time, due to the nature of the IA Flexible Investment sector, the sub-fund may have an asset allocation which is different to the average of the sector. This variable nature of the sector should be taken into consideration when comparing the performance of the sub-fund.

Rights and terms attached to each share class

A share of each class represents a proportional entitlement to the assets of the sub-fund. The allocation of income and taxation and the rights of each share in the event that a sub-fund is wound up are on the same proportional basis.

Assessment of value

The ACD carries out an assessment of value annually and publishes its findings in a summary report. This is available on ACD's website, <https://www.ifslfunds.com/sponsor/ascot-lloyd#sponsor-literature>.

Task force on climate-related financial disclosures

A statement of the climate-related financial disclosures is published on the website <https://www.ifslfunds.com/tcf-reporting>.

Cross holdings

The sub-funds of the Company do not hold shares in other sub-funds of the Company.

IFSL ASCOT LLOYD OEIC

GENERAL INFORMATION

Leverage

In accordance with the Alternative Investment Fund Manager Directive (AIFMD) we are required to disclose the 'leverage' of the sub-funds. Leverage is defined as any method by which a sub-fund increases its exposure through borrowing or the use of derivatives. 'Exposure' is defined in two ways: 'gross method'; and 'commitment method'. The sub-funds must not exceed maximum exposures under both methods. 'Gross method' exposure is calculated as the sum of all positions of the sub-funds (both positive and negative), that is, all eligible assets, liabilities and derivatives, including derivatives held for risk reduction purposes. 'Commitment method' is also calculated as the sum of all positions of the sub-funds (both positive and negative), but after netting off any derivative and security positions as specified by AIFMD rules.

The sub-funds are subject to a maximum level of incremental leverage of 10 per cent (or 0.1:1) under the commitment method and 110 per cent (or 1.1:1) under the gross method.

For clarification, under the UK AIFM Regime this means the maximum level of leverage is 110 per cent (or 1.1:1) under the commitment method and 210 per cent (or 2.1:1) under the gross method.

The maximum level of leverage under both methods has not changed since the prior year.

The total amount of leverage, and the utilisation of the maximum level of leverage, calculated as at 31 January 2026, is as follows:

Sub-fund Name	Gross Method		Commitment Method	
	Total	Utilisation	Total	Utilisation
IFSL Ascot Lloyd 3	98.15%	46.74%	101.97%	92.70%
IFSL Ascot Lloyd 4	98.08%	46.70%	103.13%	93.75%
IFSL Ascot Lloyd 5	98.01%	46.67%	100.72%	91.56%
IFSL Ascot Lloyd 6	99.17%	47.22%	100.00%	90.91%
IFSL Ascot Lloyd 7	98.28%	46.80%	100.00%	90.91%
IFSL Ascot Lloyd 8	99.50%	47.38%	100.00%	90.91%

The total amount of leverage, and the utilisation of the maximum level of leverage, calculated as at 31 January 2025, is as follows:

Sub-fund Name	Gross Method		Commitment Method	
	Total	Utilisation	Total	Utilisation
IFSL Ascot Lloyd 3	79.66%	37.93%	79.66%	72.42%
IFSL Ascot Lloyd 4	85.56%	40.74%	85.56%	77.78%
IFSL Ascot Lloyd 5	91.49%	43.57%	91.49%	83.17%
IFSL Ascot Lloyd 6	95.76%	45.60%	95.76%	87.05%
IFSL Ascot Lloyd 7	95.91%	45.67%	95.91%	87.19%
IFSL Ascot Lloyd 8	96.61%	46.00%	96.61%	87.83%

GENERAL INFORMATION

Remuneration policy

In line with the requirements of the AIFMD, Investment Fund Services Limited, the Alternative Investment Fund Manager (AIFM), is subject to a remuneration policy which is consistent with the principles outlined in the European Securities and Markets Authority guidelines on sound remuneration policies under the AIFMD. The remuneration policies are designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of its senior staff is in line with the risk policies and objectives of the Alternative Investment Funds (AIFs) it manages.

The quantitative remuneration disclosures as at 30 September 2025 (the AIFM's year-end) are set out below:

	Number of identified staff	Total remuneration paid	Fixed remuneration paid	Variable remuneration paid
		£	£	£
Remuneration paid to staff of the AIFM who have a material impact on the risk profile of the Company				
Senior management	10	1,327,152	1,078,980	248,172
Risk takers and other identified staff	6	644,746	582,160	62,586
Allocation of total remuneration of the employees of the AIFM to the Company				
Senior management	0.67	89,112	72,448	16,664
Risk takers and other identified staff	0.40	43,291	39,089	4,202

The total number of staff employed by the AIFM's group was 154 as at 30 September 2025. The total remuneration paid to those staff was £11,730,432, of which £3,173,764 is attributable to the AIFM. The information is provided for the purpose of Regulation 107(1)(a) of the AIFM regulations but not for the purposes of Regulations 107(1)(b) and (c) of the AIFM regulations.

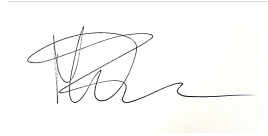

The allocation of remuneration to the AIF is based on Assets Under Management (AUM) and the figures disclosed only include remuneration paid to individuals directly employed by the AIFM's group. The way these disclosures are calculated may change in the future.

AUTHORISED CORPORATE DIRECTOR'S STATEMENT

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

Allan Hamer
Director

Massimiliano Zorza
Director

Investment Fund Services Limited
26 May 2026

STATEMENT OF AUTHORISED CORPORATE DIRECTOR'S RESPONSIBILITIES

The Financial Conduct Authority's Collective Investment Schemes Sourcebook (COLL) and the Investment Funds Sourcebook (FUND) requires the Authorised Corporate Director (ACD) to prepare financial statements for each accounting year which give a true and fair view of the financial position of the Company comprising of its sub-funds and of its net revenue and the net capital gains for the year.

In preparing those financial statements the ACD is required to:

- comply with the disclosure requirements of the Statement of Recommended Practice relating to UK Authorised Funds issued in May 2014 and amended in June 2017;
- follow United Kingdom Generally Accepted Accounting Practice and applicable accounting standards;
- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The ACD is required to keep proper accounting records and to manage the Company in accordance with the COLL rules, the Instrument of Incorporation and the Prospectus. The ACD is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The ACD is responsible for ensuring that, to the best of its knowledge and belief, there is no relevant audit information of which the auditor is unaware. It is the responsibility of the ACD to take all necessary steps as a director to familiarise itself with any relevant audit information and to establish that the auditor is aware of that information.

STATEMENT OF THE DEPOSITARY'S RESPONSIBILITIES AND REPORT OF THE DEPOSITARY

Statement of the Depositary's Responsibilities in Respect of the Scheme and Report of the Depositary to the Shareholders of the IFSL Ascot Lloyd OEIC ("the Company") for the period ended 31 January 2026

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook and the Investment Funds Sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228), as amended, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Company's Instrument of Incorporation and Prospectus (together "the Scheme documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depositary must ensure that:

- the Company's cash flows are properly monitored, and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares of the Company are calculated in accordance with the Regulations;
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Alternative Investment Fund Manager ("the AIFM") are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that the Company is managed in accordance with the Scheme documents and the Regulations in relation to the investment and borrowing powers applicable to the Company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as Depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AIFM:

(i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company; and

(ii) has observed the investment and borrowing powers and restrictions applicable to the Company in accordance with the Regulations and Scheme documents of the Company.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF IFSL ASCOT LLOYD OEIC

Opinion

We have audited the financial statements of IFSL Ascot Lloyd OEIC ("the Company") comprising each of its presented sub-funds, for the year ended 31 January 2026, which comprise the Statement of Total Return, the Statement of Change in Net Assets Attributable to Shareholders, the Balance Sheet, the related notes and the Distribution Tables, and the accounting, distribution and risk management policies of the Company, which include a summary of significant accounting policies.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 'The Financial Reporting Standard applicable to the United Kingdom and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the financial position of the Company comprising each of its sub-funds, as at 31 January 2026 and of the net revenue and the net capital gains on the scheme property of the Company comprising each of its sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the FRC) Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Authorised Corporate Director's ("the ACD") use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of 12 months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the ACD with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

Other information

The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. The ACD is responsible for the other information contained within the Annual Report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF IFSL ASCOT LLOYD OEIC

Opinions on other matters prescribed by the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority (the "FCA")

In our opinion:

- the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the FCA and the Instrument of Incorporation;
- there is nothing to indicate that adequate accounting records have not been kept or that the financial statements are not in agreement with those records; and
- the information given in the ACD's report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matter in relation to which the Collective Investment Schemes Sourcebook of the FCA requires us to report to you if, in our opinion:

- we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

Responsibilities of the ACD

As explained more fully in the Statement of the Authorised Corporate Director's Responsibilities set out on page 11, the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the ACD determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the ACD is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the ACD either intends to wind up or terminate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF IFSL ASCOT LLOYD OEIC

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are United Kingdom Generally Accepted Accounting Practice (UK GAAP), the Investment Management Association's Statement of Recommended Practice (IMA SORP), the FCA Collective Investment Schemes Sourcebook, the OEIC Regulations, the Company's Instrument of Incorporation and the Prospectus.
- We understood how the Company is complying with those frameworks through discussions with the ACD and the Company's administrator and a review of the Company's documented policies and procedures.
- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by considering the risk of management override, specifically management's opportunity to influence revenue and amounts available for distribution.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved testing of journal entries, with a particular focus on manually posted entries and those journals reflecting large and unusual transactions. We also reviewed the reporting to the ACD with respect to the application of the documented policies and procedures and reviewed the financial statements to test compliance with the reporting requirements of the Company.
- Due to the regulated nature of the Company, the Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities to identify non-compliance with the applicable laws and regulations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Company's Shareholders, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes Sourcebook of the FCA. Our audit work has been undertaken so that we might state to the Company's Shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's Shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

AUTHORISED INVESTMENT MANAGER'S REPORT - SUMMARY OF THE MARKETS

for the year ended 31 January 2026

Global markets made steady progress over the twelve months to the end of January 2026, although returns varied by region and asset class. The period began with investors still assessing the outlook for inflation, interest rates and ongoing geopolitical tensions. These concerns led to periods of uncertainty, but conditions generally improved as inflation eased across many major economies and economic data remained relatively stable.

There were a number of short-lived episodes of volatility during the year. In April, markets experienced a brief increase in volatility following a major policy announcement on global trade tariffs by the President of the United States. This led to sharper price movements over a short period. Geopolitical developments also contributed to shifts in sentiment at times, although these did not prevent most markets from delivering strong gains overall.

In equities, emerging markets and European equities were among the stronger performers over the period. Improved trade activity and resilient company earnings supported returns, while policy measures in parts of Asia helped stabilise conditions. The UK market also produced solid gains, supported by energy and materials companies and improving confidence as inflation pressures eased. The US market finished the period higher, although returns were more moderate than in some other regions.

Bond markets delivered more modest returns than equities over the period. Government bond returns were relatively low as interest rate expectations changed during the year, which led to periods of volatility in bond yields. However, corporate bond markets performed more strongly, supported by higher income levels and resilient credit conditions.

Commodities were among the stronger performing asset classes during the year. Precious metals, particularly gold, delivered very strong returns as some investors sought stability during periods of uncertainty. Industrial metals also benefited from continued investment in technology and infrastructure.

Overall, most major asset classes delivered positive returns over the period, despite ongoing geopolitical tensions and periods of market volatility.

Ascot Lloyd Investment Management Limited
23 February 2026

IFSL ASCOT LLOYD OEIC

NOTES TO THE FINANCIAL STATEMENTS - ACCOUNTING, DISTRIBUTION AND RISK MANAGEMENT POLICIES

for the year ended 31 January 2026

1.1 ACCOUNTING POLICIES

During the year under review, IFSL Ascot Lloyd OEIC consisted of ten sub-funds: IFSL Ascot Lloyd 3; IFSL Ascot Lloyd 4; IFSL Ascot Lloyd 5; IFSL Ascot Lloyd 6; IFSL Ascot Lloyd 7; IFSL Ascot Lloyd 8; IFSL Ascot Lloyd Passive Focus 4; IFSL Ascot Lloyd Passive Focus 5; IFSL Ascot Lloyd Passive Focus 6; and IFSL Ascot Lloyd Passive Focus 7.

On 22 September 2025, the four new Passive Focus Funds were launched: IFSL Ascot Lloyd Passive Focus 4; IFSL Ascot Lloyd Passive Focus 5; IFSL Ascot Lloyd Passive Focus 6; and IFSL Ascot Lloyd Passive Focus 7. In accordance with the Collective Investment Schemes Sourcebook (COLL 6.8.2.R(4)), the four new Passive Focus Funds have adopted an extended first accounting period ending 31 January 2027. Therefore, these sub-funds are not presented within the 31 January 2026 annual report and audited financial statements of IFSL Ascot Lloyd OEIC.

These accounting policies apply to all the presented sub-funds of the Company and were applied consistently in the prior period.

Basis of accounting

The financial statements have been prepared in compliance with UK Financial Reporting Standard 102 ("FRS 102") and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds issued by the Investment Association in May 2014 and amended in June 2017.

The financial statements are prepared in sterling, which is the functional currency of the sub-funds. Monetary amounts in these financial statements are rounded to the nearest pound.

The financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

There are no material events that have been identified that may cast significant doubt about the Company's ability to continue as a going concern for at least the next twelve months from the date these financial statements are authorised for issue. The ACD believes that the Company has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements.

Revenue

Dividends from quoted ordinary securities, and distributions receivable from onshore Collective Investment Schemes are recognised when the security is quoted ex-dividend.

Income from offshore collective investment schemes is recorded on the ex-dividend date and additional reported income is recognised when reported.

Bank interest is accounted for on an accruals basis.

Allocation of revenue

Revenue, attributable after expenses to multiple share classes, with the exception of the ACD's fee, which is directly attributable to individual share classes, is allocated to share classes pro-rata to the value of net assets of the relevant share class on the day that the revenue is incurred.

Expenses

All expenses, other than those relating to the purchase and sale of investments, are charged initially against revenue on an accruals basis.

Distributions from Collective Investment Schemes

Distributions received from investments in collective investment schemes may include an element of equalisation which represents the average amount of revenue included in the price paid for the shares. Equalisation is treated as a return of capital for taxation purposes and does not carry a tax credit.

Valuation

The valuation point was 12:00 on 30 January 2026 being the last valuation point of the accounting year.

Listed investments are valued at fair value which is the bid price.

Unlisted, unapproved, illiquid or suspended securities are valued at the ACD's best estimate of the amount that would be received from the immediate transfer at arm's length in a manner designed to show fair value. This modelling takes into account, where appropriate, latest dealing prices, valuations from reliable sources, financial performance, maturity of the company and other relevant factors.

Where applicable, investment valuations exclude any element of accrued revenue.

NOTES TO THE FINANCIAL STATEMENTS - ACCOUNTING, DISTRIBUTION AND RISK MANAGEMENT POLICIES

for the year ended 31 January 2026

ACCOUNTING POLICIES (continued)

Valuation (continued)

Investments in collective investment schemes have been valued at cancellation price for dual-priced funds or the single price for single priced funds, using the latest available published prices at the year end.

Taxation

Corporation tax has been provided for at 20% on taxable income less expenses. Deferred taxation is provided on a full provision basis on timing differences arising from the different treatment of items for accounting and tax purposes. Potential future liabilities and assets are recognised where the transactions, or events giving rise to them, occurred before the balance sheet date.

Exchange rates

Assets and liabilities denominated in foreign currencies are translated into sterling at the exchange rates prevailing at 12:00 on 30 January 2026 being the last valuation point of the accounting year. Revenue and expenditure transactions are translated at the rates of exchange ruling on the dates of the transactions. Exchange differences on such transactions follow the same treatment at the principal amounts.

1.2 DISTRIBUTION POLICIES

The distribution policy for each sub-fund is to distribute all available revenue, after deduction of expenses properly chargeable against revenue. Gains and losses on non-derivative instruments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution. Revenue recognised from holdings in accumulation shares in collective investment schemes is included in the amount available for distribution.

During the year, all sub-funds were less than 60% invested in qualifying investments (as defined by SI 2006/964, Reg. 20) and therefore qualified as equity funds. The sub-funds paid dividend distributions.

Equalisation

Equalisation applies only to shares purchased during the distribution period. It is the average amount of income included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to UK income tax but must be deducted from the cost of the shares for UK capital gains tax purposes.

1.3 RISK MANAGEMENT POLICIES

In pursuing the investment objectives, the sub-funds hold a number of financial instruments. The sub-funds' financial instruments comprise securities, together with cash balances, debtors and creditors that arise directly from their operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for issues and payable for redemptions and debtors for accrued income.

The main risks arising from the sub-funds' financial instruments and the ACD's policies for managing these risks are summarised below. The ACD reviews (and agrees with the Depositary) the policies for managing each of these risks. The policies have remained unchanged since the beginning of the period to which these financial statements relate.

The sub-funds are managed according to the COLL 5, 'Investment and Borrowing Powers' which helps achieve the statutory objective of protecting consumers by laying down the minimum standards for the investments that may be held by an authorised fund. In particular: (a) the proportion of transferable securities and derivatives that may be held by the authorised fund is restricted if those transferable securities and derivatives are not listed on an eligible market. The intention of this is to restrict the transferable securities and derivatives that cannot be accurately valued and readily disposed of; and (b) authorised funds are required to comply with a number of investment rules that require the spreading of risk.

Market price risk

Market price risk is the risk that the value of a sub-fund's investment holdings will fluctuate as a result of changes in market prices caused by factors other than interest rate or foreign currency movement. Market price risk arises mainly from uncertainty about future prices of financial instruments the sub-funds hold. It represents the potential loss a sub-fund might suffer through holding market positions in the face of price movements. Each sub-fund's investment portfolio is exposed to market price fluctuations which are monitored by the ACD in pursuance of the investment objectives and policies as set out in the Prospectus.

NOTES TO THE FINANCIAL STATEMENTS - ACCOUNTING, DISTRIBUTION AND RISK MANAGEMENT POLICIES

for the year ended 31 January 2026

RISK MANAGEMENT POLICIES (continued)

Foreign currency risk

The income and capital value of the sub-funds' investments can be affected by foreign currency translation movements as some of the sub-fund's assets and income may be denominated in currencies other than sterling, which is the sub-funds' functional currency.

The ACD has identified three areas where foreign currency risk could impact the sub-funds. These are, movements in exchange rates affecting the value of investments, short term timing differences such as exposure to exchange rate movements in the year between when an investment purchase or sale is entered into and the date when settlement of the investment occurs, and finally, movement in exchange rates affecting income received by a sub-fund. The sub-funds convert all receipts of income, received in currency, into sterling of the day of receipt.

To manage foreign currency risk the sub-funds are permitted to invest in forward foreign currency contracts for the purpose of reducing the exposure of the sub-funds to a foreign currency.

The foreign currency exposure within the sub-funds is monitored to ensure that this is manageable and sensible.

Interest rate risk

Interest rate risk is the risk that the value of the sub-funds' investment holdings will fluctuate as a result of changes in interest rates. The sub-funds' cash holdings are held in deposit accounts, whose rates are determined by the banks concerned on a daily basis.

Interest rate risk is managed through a limit framework and investment guidelines with which the sub-funds must comply. These include restrictions on position size, and the level of interest rate risk. The Investment Manager continuously reviews interest rates and inflation expectations, the assessment of this may result in a change in investment strategy.

Liquidity risk

The sub-funds' assets comprise mainly of readily realisable securities. The main liability of the sub-funds is the redemption of any shares that investors wish to sell. Assets of the sub-funds may need to be sold if insufficient cash is available to finance such redemptions. The liquidity of the sub-funds' assets is regularly reviewed by the ACD.

The ACD has an approved list of counterparties it uses for investment transactions which is reviewed on a regular basis.

Credit and counterparty risk

Certain transactions in securities that the sub-funds enter into expose them to the risk that the counterparty will not deliver the investment for a purchase, or cash for a sale after the sub-funds have fulfilled their responsibilities. The sub-funds only buy and sell investments through brokers which have been approved by the ACD as an acceptable counterparty.

Concentration risk

Some of the underlying collective investment schemes invest solely in certain markets, such as UK shares or fixed interest securities. This allows them to focus on those markets' potential but means that they are not spread amongst a range of markets. Securities in the same market tend to be affected by the same factors, so the collective investment schemes may experience greater fluctuations in price. The asset allocations aim to minimise this risk whenever possible, whilst still meeting the objectives of the sub-funds.

Derivatives and other financial instruments

The ACD is permitted to use derivatives for the purposes of efficient portfolio management. Forward currency transactions may also be entered to hedge the portfolio against currency movement. Investment performance of derivatives can be volatile and may present greater risks than traditional investments.

The ACD is obliged through FCA rules to put in place a risk management policy which sets out how the ACD measures and monitors these risks.

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 3

AUTHORISED INVESTMENT MANAGER'S REPORT

for the year ended 31 January 2026

Performance to 31 January 2026

	<u>Six months</u>	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Ascot Lloyd 3	4.68%	7.19%	18.32%	12.16%
IA Mixed Investment 0-35% Shares Sector	4.72%	7.24%	17.67%	11.68%

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance summary

The IFSL Ascot Lloyd 3 sub-fund returned 7.19% over the 12 months to 31 January 2026 compared to 7.24% for the sub-fund's performance comparator.

Market review

Markets delivered positive returns over the year, although performance varied across asset classes and regions. Equity markets were generally strong, with emerging markets and Europe among the better performers, while the UK also produced very solid gains. The US market finished the period higher, although returns were more moderate than in some other regions.

Bond markets delivered more modest returns than equities over the period. Government bond returns were relatively low as interest rate expectations changed during the year. However, corporate bond markets performed more strongly, supported by higher income levels and resilient credit conditions.

Sub-fund performance review

The IFSL Ascot Lloyd 3 sub-fund very marginally underperformed its performance comparator over the period.

Within fixed income, fund selection was positive overall, with international bond and index-linked government bond funds among the strongest contributors.

Across equities, Emerging Markets and Japan contributed positively over the period, with exposure to a value-focused strategy within Japan supporting relative returns. Given the relatively modest allocation to these regions within the portfolio, their overall impact was proportionate.

These gains were partly offset by weaker relative returns from UK and European equity funds. In the UK, exposure to medium and smaller sized companies held back performance relative to the broader market. In Europe, one of the underlying funds had a bias towards larger, higher quality companies, which underperformed over the period. The Asia Pacific ex Japan allocation also lagged its benchmark. Within US equities, performance was weaker overall, although exposure to a value-oriented strategy helped offset some of the relative losses.

The allocation to alternative strategies also added to performance over the period. Returns were supported by diversified absolute return and managed futures strategies, which performed well during periods of market volatility.

Portfolio activity

Changes were made to the portfolios during the year, with activity taking place in the first three quarters. No changes were made during the final quarter of 2025.

In February 2025, portfolios were rebalanced to implement the second and final phase of previously announced asset allocation changes. This included further allocations to alternative investments and the addition of a high yield bond allocation. An additional Emerging Markets equity fund was also introduced.

During the second quarter, changes were made within fixed income and Asian equities. The global bond allocation was adjusted, with the Muzinich Global Tactical Credit fund replaced by the Legal & General Strategic Bond fund to improve diversification within the asset class. Within Asia, the Schroder Asian Income fund was replaced by the Federated Hermes Asia ex Japan Equity fund.

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 3

AUTHORISED INVESTMENT MANAGER'S REPORT

for the year ended 31 January 2026

Investment commentary

Portfolio activity (continued)

In the third quarter, further changes were made within fixed income. The BlackRock Corporate Bond fund was replaced by the Man Sterling Corporate Bond fund. In addition, the Allianz Gilt Yield fund was replaced by the Royal London UK Government Bond fund following changes within the Allianz management team.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the year. Where it is considered unsuitable to use the total expenses paid by each share class in the year to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the year, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the year and the average shares in issue for the pence per share figures.

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 3

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the year the synthetic risk and reward indicator has remained unchanged.

	<u>2,739,532</u>	<u>3,464,036</u>

^A The short-term money market investments represent the following holdings: 8,953 shares (2025: 12,698 shares) in BlackRock ICS Sterling Liquidity Premier GBP; and 874,582 shares (2025: 1,247,498 shares) in Federated Hermes Short-Term Sterling Prime '8'.

11 RELATED PARTIES

The ACD is involved in all transactions in the shares of the sub-fund, the aggregate values of which are set out in the statement of change in net assets attributable to shareholders and note 7. Amounts due from/to the ACD in respect of share transactions at the period end are disclosed in notes 8 and 9, respectively. Amounts paid to the ACD or associates in respect of the ACD's periodic charge and other fees are disclosed in note 5. Amounts due to the ACD at the year end are £287,376 (2025: £12,992).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd European Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £224,104 (2025: £254,221) and sales transactions was £110,610 (2025: £14,911).
- b) Revenue receivable for the year was £6,999 (2025: nil) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £413,349 (2025: £254,235).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd US Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £85,451 (2025: £72,550) and sales transactions was £508,580 (2025: £715,280).
- b) Revenue receivable for the year was £4,386 (2025: nil) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £1,095,584 (2025: £1,492,014).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £20,390 (2025: £157,123) and sales transactions was £310,607 (2025: £313,080).
- b) Revenue receivable for the year was £7,468 (2025: £12,320) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £431,785 (2025: £679,092).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity Income 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £15,121 (2025: nil) and sales transactions was £181,557 (2025: £231,986).
- b) Revenue receivable for the year was £18,338 (2025: £28,971) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £532,703 (2025: £638,697).

12 SHARE CLASSES

The share classes in issue for the sub-fund and the annual management charge for each share class is as follows:

A Income / Accumulation	0.38%
C Income	0.13%
D Accumulation	1.03%

13 SHAREHOLDERS' FUND RECONCILIATION

During the year the ACD has issued and cancelled shares as set out below:

	<u>A Income</u>	<u>A Accumulation</u>	<u>C Income</u>
Opening shares in issue at 1 February 2025	310,367	5,311,162	9,638,671
Shares issued	5,336	287,446	582,947
Shares cancelled	(76,871)	(1,140,993)	(2,717,508)
Closing shares in issue at 31 January 2026	<u>238,832</u>	<u>4,457,615</u>	<u>7,504,110</u>

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

SHAREHOLDERS' FUND RECONCILIATION (continued)

	D Accumulation
Opening shares in issue at 1 February 2025	92,293
Shares issued	3,138
Shares cancelled	(1,183)
Closing shares in issue at 31 January 2026	94,248

14 RISK DISCLOSURES

Market price risk sensitivity

A five per cent increase in the market prices of the sub-fund's portfolio would have the effect of increasing the return and net assets by £581,187 (2025: £661,704). A five per cent decrease would have an equal and opposite effect.

Interest rate risk

31 January 2026

31 January 2025

£

£

The interest rate risk profile of financial assets and liabilities consists of the following:

Financial assets floating rate ^A	2,739,532	3,464,036
Financial assets interest bearing instruments	7,339,226	8,572,639
Financial assets non-interest bearing instruments	4,559,620	4,687,133
Financial liabilities non-interest bearing instruments	(655,584)	(219,186)
	<u>13,982,794</u>	<u>16,504,622</u>

^A Floating rate assets and liabilities comprise bank balances and overdrafts, whose rates are determined by reference to SONIA or an international equivalent borrowing rate. Interest on investments is variable based on the distribution received from underlying investments.

Interest rate risk sensitivity

An interest rate sensitivity disclosure has not been included because the investments held by the sub-fund are collective investment schemes, which may invest in interest bearing financial assets, however, information regarding these investments is not available from the ACD/fund managers as at the sub-fund's balance sheet date.

Liquidity risk

31 January 2026

31 January 2025

£

£

The following table provides a maturity analysis of the sub-fund's financial liabilities:

Within one year:	Distribution payable on income shares	106,398	107,943
	Other creditors	549,186	111,243
		<u>655,584</u>	<u>219,186</u>

15 FAIR VALUE HIERARCHY FOR INVESTMENTS

Basis of valuation	31 January 2026		31 January 2025	
	Assets (£)	Liabilities (£)	Assets (£)	Liabilities (£)
Level 1 - Quoted prices	-	-	-	-
Level 2 - Observable market data	11,623,744	-	13,234,076	-
Level 3 - Unobservable data	-	-	-	-
	<u>11,623,744</u>	<u>-</u>	<u>13,234,076</u>	<u>-</u>

The intention of a fair value measurement is to estimate the price at which an asset or liability could be exchanged in the market conditions prevailing at the measurement date. The measurement assumes the exchange is an orderly transaction (that is, it is not a forced transaction, involuntary liquidation or distress sale) between knowledgeable, willing participants on an independent basis.

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities. The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs.

In accordance with FRS102 the sub-fund classifies fair value measurement under the following levels:

Level 1 - Unadjusted quoted price in an active market for an identical instrument;

Level 2 - Valuation techniques using observable inputs other than quoted prices within level 1; and

Level 3 - Valuation techniques using unobservable inputs.

Performance to 31 January 2026

	<u>Six months</u>	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Ascot Lloyd 4	5.57%	8.29%	23.83%	21.92%
IA Mixed Investment 20-60% Shares Sector	6.13%	9.23%	23.15%	22.30%

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance summary

The IFSL Ascot Lloyd 4 sub-fund returned 8.29% over the 12 months to 31 January 2026 compared to 9.23% for the sub-fund's performance comparator.

Market review

Markets delivered positive returns over the year, although performance varied across asset classes and regions. Equity markets were generally strong, with emerging markets and Europe among the better performers, while the UK also produced very solid gains. The US market finished the period higher, although returns were more moderate than in some other regions.

Bond markets delivered more modest returns than equities over the period. Government bond returns were relatively low as interest rate expectations changed during the year. However, corporate bond markets performed more strongly, supported by higher income levels and resilient credit conditions.

Sub-fund performance review

The IFSL Ascot Lloyd 4 sub-fund underperformed its performance comparator over the period.

Within fixed income, fund selection was positive overall, with international bond and index-linked government bond funds among the strongest contributors.

Across equities, Emerging Markets was the largest positive contributor, followed by Japan, where exposure to a value-focused strategy added to relative returns. These gains were partly offset by weaker relative returns from UK and European equity funds. In the UK, the fund's exposure to medium and smaller sized companies held back performance relative to the broader market. In Europe, one of the underlying funds had a bias towards larger, higher quality companies, which underperformed over the period. The Asia Pacific ex Japan allocation also lagged its benchmark. Within US equities, performance was weaker overall, although exposure to a value-oriented strategy helped offset some of the relative losses.

The allocation to alternative strategies also added to performance over the period. Returns were supported by diversified absolute return and managed futures strategies, which performed well during periods of market volatility.

Portfolio activity

Changes were made to the portfolios during the year, with activity taking place in the first three quarters. No changes were made during the final quarter of 2025.

In February 2025, portfolios were rebalanced to implement the second and final phase of previously announced asset allocation changes. This included further allocations to alternative investments and the addition of a high yield bond allocation. An additional Emerging Markets equity fund was also introduced.

During the second quarter, changes were made within fixed income and Asian equities. The global bond allocation was adjusted, with the Muzinich Global Tactical Credit fund replaced by the Legal & General Strategic Bond fund to improve diversification within the asset class. Within Asia, the Schroder Asian Income fund was replaced by the Federated Hermes Asia ex Japan Equity fund.

In the third quarter, further changes were made within fixed income. The BlackRock Corporate Bond fund was replaced by the Man Sterling Corporate Bond fund. In addition, the Allianz Gilt Yield fund was replaced by the Royal London UK Government Bond fund following changes within the Allianz management team.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the year. Where it is considered unsuitable to use the total expenses paid by each share class in the year to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the year, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the year and the average shares in issue for the pence per share figures.

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 4

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the year the synthetic risk and reward indicator has remained unchanged.

Shares cancelled	(1,123,861)	(11,808,085)	(24,148,863)
Shares converted	328,605	-	(330,306)
Closing shares in issue at 31 January 2026	<u>2,234,719</u>	<u>36,851,485</u>	<u>81,344,947</u>

	D Accumulation
Opening shares in issue at 1 February 2025	3,780,367
Shares issued	99,261
Shares cancelled	(1,807,971)
Shares converted	-
Closing shares in issue at 31 January 2026	<u>2,071,657</u>

14 RISK DISCLOSURES

Market price risk sensitivity

A five per cent increase in the market prices of the sub-fund's portfolio would have the effect of increasing the return and net assets by £6,837,538 (2025: £8,036,295). A five per cent decrease would have an equal and opposite effect.

Interest rate risk

31 January 2026

31 January 2025

£

£

The interest rate risk profile of financial assets and liabilities consists of the following:

Financial assets floating rate ^A	24,344,525	27,499,945
Financial assets interest bearing instruments	68,742,641	77,581,336
Financial assets non-interest bearing instruments	71,262,575	83,534,202
Financial liabilities non-interest bearing instruments	(9,421,956)	(2,645,014)
	<u>154,927,785</u>	<u>185,970,469</u>

^A Floating rate assets and liabilities comprise bank balances and overdrafts, whose rates are determined by reference to SONIA or an international equivalent borrowing rate. Interest on investments is variable based on the distribution received from underlying investments.

Interest rate risk sensitivity

An interest rate sensitivity disclosure has not been included because the investments held by the sub-fund are collective investment schemes, which may invest in interest bearing financial assets, however, information regarding these investments is not available from the ACD/fund managers as at the sub-fund's balance sheet date.

Liquidity risk

		<u>9,421,956</u>	<u>2,645,014</u>

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

15 FAIR VALUE HIERARCHY FOR INVESTMENTS

Basis of valuation	31 January 2026		31 January 2025	
	Assets (£)	Liabilities (£)	Assets (£)	Liabilities (£)
Level 1 - Quoted prices	-	-	-	-
Level 2 - Observable market data	136,750,760	-	160,725,898	-
Level 3 - Unobservable data	-	-	-	-
	<u>136,750,760</u>	<u>-</u>	<u>160,725,898</u>	<u>-</u>

The intention of a fair value measurement is to estimate the price at which an asset or liability could be exchanged in the market conditions prevailing at the measurement date. The measurement assumes the exchange is an orderly transaction (that is, it is not a forced transaction, involuntary liquidation or distress sale) between knowledgeable, willing participants on an independent basis.

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities. The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs.

In accordance with FRS102 the sub-fund classifies fair value measurement under the following levels:

Level 1 - Unadjusted quoted price in an active market for an identical instrument;

Level 2 - Valuation techniques using observable inputs other than quoted prices within level 1; and

Level 3 - Valuation techniques using unobservable inputs.

16 POST BALANCE SHEET EVENTS

Since 30 January 2026, the Net Asset Value per share has changed as follows:

	Net Asset Value per share (pence)			Movement (%)
	30 January 2026 ^A	18 May 2026		
A Income	124.90	124.90		0.00%
A Accumulation	134.60	136.10		1.11%
C Income	124.30	124.30		0.00%
D Accumulation	125.10	126.30		0.96%

^A These Net Asset Values differ from those in the Comparative Table as they are the quoted Net Asset Values.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the year ended 31 January 2026

Performance to 31 January 2026

	<u>Six months</u>	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Ascot Lloyd 5	6.68%	9.43%	30.35%	32.21%
IA Mixed Investment 40-85% Shares Sector	7.26%	9.79%	29.11%	33.75%

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance summary

The IFSL Ascot Lloyd 5 sub-fund returned 9.43% over the 12 months to 31 January 2026 compared to 9.79% for the sub-fund's performance comparator.

Market review

Markets delivered positive returns over the year, although performance varied across asset classes and regions. Equity markets were generally strong, with emerging markets and Europe among the better performers, while the UK also produced very solid gains. The US market finished the period higher, although returns were more moderate than in some other regions.

Bond markets delivered more modest returns than equities over the period. Government bond returns were relatively low as interest rate expectations changed during the year. However, corporate bond markets performed more strongly, supported by higher income levels and resilient credit conditions.

Sub-fund performance review

The IFSL Ascot Lloyd 5 sub-fund underperformed its performance comparator modestly over the period.

Within fixed income, fund selection was positive overall, with international bond and index-linked government bond funds outperforming their benchmarks.

Across equities, Emerging Markets and Japan were positive contributors, with the underlying funds outperforming their benchmarks. However, weaker relative returns from UK and European equity funds detracted from overall performance. In the UK, exposure to medium and smaller sized companies held back relative returns. In Europe, one of the underlying funds had a bias towards larger, higher quality companies, which underperformed over the period. The Asia Pacific ex Japan allocation also lagged its benchmark, while US equity exposure detracted modestly, although value-oriented exposure helped offset part of this weakness.

The allocation to alternative strategies also added to performance over the period. Returns were supported by diversified absolute return and managed futures strategies, which performed well during periods of market volatility.

Portfolio activity

Changes were made to the portfolios during the year, with activity taking place in the first three quarters. No changes were made during the final quarter of 2025.

In February 2025, portfolios were rebalanced to implement the second and final phase of previously announced asset allocation changes. This included further allocations to alternative investments and the addition of a high yield bond allocation. An additional Emerging Markets equity fund was also introduced.

During the second quarter, changes were made within fixed income and Asian equities. The global bond allocation was adjusted, with the Muzinich Global Tactical Credit fund replaced by the Legal & General Strategic Bond fund to improve diversification within the asset class. Within Asia, the Schroder Asian Income fund was replaced by the Federated Hermes Asia ex Japan Equity fund.

In the third quarter, further changes were made within fixed income. The BlackRock Corporate Bond fund was replaced by the Man Sterling Corporate Bond fund. In addition, the Allianz Gilt Yield fund was replaced by the Royal London UK Government Bond fund following changes within the Allianz management team.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the year. Where it is considered unsuitable to use the total expenses paid by each share class in the year to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifsifunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the year, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the year and the average shares in issue for the pence per share figures.

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the year the synthetic risk and reward indicator has remained unchanged.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

6 TAXATION	31 January 2026	31 January 2025
	£	£
a Analysis of the tax charge for the year		
UK corporation tax at 20% (2025: 20%)	1,623,130	1,140,889
Total tax charge for the year (see note 6(b))	<u>1,623,130</u>	<u>1,140,889</u>
b Factors affecting the tax charge for the year		
The taxation assessed for the year is lower (2025: lower) than the standard rate of corporation tax in the UK for an open-ended investment company 20% (2025: 20%). The differences are explained below.		
Net revenue before taxation	12,029,973	10,810,450
UK corporation tax at 20% (2025: 20%)	2,405,995	2,162,090
Effects of:		
Revenue not subject to taxation	(783,640)	(1,021,201)
Tax effect of capitalised management fee rebate	775	-
Total tax charge for the year (see note 6(a))	<u>1,623,130</u>	<u>1,140,889</u>
c Provision for deferred taxation		
No provision for deferred tax has been made in the current year or prior year.		
7 DISTRIBUTIONS	31 January 2026	31 January 2025
	£	£
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim	4,372,813	4,229,912
Final	5,500,345	5,139,270
Amounts deducted on cancellation of shares	644,284	497,753
Amounts added on issue of shares	(109,620)	(198,648)
Equalisation on conversions	94	1,448
Revenue brought forward	(298)	(174)
Distributions	<u>10,407,618</u>	<u>9,669,561</u>
Movement between net revenue and distributions:

^A The short-term money market investments represent the following holdings: 72,478 shares (2025: 161,657 shares) in BlackRock ICS Sterling Liquidity 'Premier' GBP; and 7,080,506 shares (2025: 15,842,284 shares) in Federated Hermes Short-Term Sterling Prime '8'.

11 RELATED PARTIES

The ACD is involved in all transactions in the shares of the sub-fund, the aggregate values of which are set out in the statement of change in net assets attributable to shareholders and note 7. Amounts due from/to the ACD in respect of share transactions at the period end are disclosed in notes 8 and 9, respectively. Amounts paid to the ACD or associates in respect of the ACD's periodic charge and other fees are disclosed in note 5. Amounts due to the ACD at the period end are £747,634 (2025: £313,810).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd European Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £7,254,850 (2025: £1,022,019) and sales transactions was £9,730,104 (2025: £5,573,213).
- b) Revenue receivable for the year was £420,445 (2025: £529,352) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £30,883,397 (2025: £30,567,230).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd US Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £6,235,644 (2025: £1,058,883) and sales transactions was £30,620,982 (2025: £40,020,501).
- b) Revenue receivable for the year was £364,809 (2025: nil) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £91,056,451 (2025: £112,819,280).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £643,179 (2025: £1,059,713) and sales transactions was £21,862,047 (2025: £13,439,779).
- b) Revenue receivable for the year was £549,521 (2025: £835,630) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £29,790,390 (2025: £47,889,525).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity Income 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £116,234 (2025: nil) and sales transactions was £16,125,909 (2025: £14,818,847).
- b) Revenue receivable for the year was £1,313,658 (2025: £2,077,952) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £36,843,811 (2025: £48,566,118).

12 SHARE CLASSES

The share classes in issue for the sub-fund and the annual management charge for each share class is as follows:

A Income / Accumulation	0.38%
C Income	0.13%
D Income / Accumulation	1.03%

NOTES TO THE FINANCIAL STATEMENTS

13 SHAREHOLDERS' FUND RECONCILIATION

During the year the ACD has issued and cancelled shares as set out below:

	A Income	A Accumulation	C Income
Opening shares in issue at 1 February 2025	2,520,581	188,158,655	206,656,132
Shares issued	180,281	6,459,724	8,061,971
Shares cancelled	(681,555)	(42,413,539)	(35,283,893)
Shares converted	240,931	-	(241,450)
Closing shares in issue at 31 January 2026	<u>2,260,238</u>	<u>152,204,840</u>	<u>179,192,760</u>

	D Income	D Accumulation
Opening shares in issue at 1 February 2025	294,276	12,131,939
Shares issued	2,998	857,627
Shares cancelled	(86,827)	(5,802,747)
Shares converted	-	-
Closing shares in issue at 31 January 2026	<u>210,447</u>	<u>7,186,819</u>

14 RISK DISCLOSURES

Market price risk sensitivity

A five per cent increase in the market prices of the sub-fund's portfolio would have the effect of increasing the return and net assets by £22,910,182 (2025: £24,633,054). A five per cent decrease would have an equal and opposite effect.

Interest rate risk

31 January 2026
£

31 January 2025
£

The interest rate risk profile of financial assets and liabilities consists of the following:

Financial assets floating rate ^A	30,943,261	46,506,935
Financial assets interest bearing instruments	177,216,836	169,896,426
Financial assets non-interest bearing instruments	290,438,339	323,525,332
Financial liabilities non-interest bearing instruments	(15,700,880)	(3,908,637)
	<u>482,897,556</u>	<u>536,020,056</u>

^A Floating rate assets and liabilities comprise bank balances and overdrafts, whose rates are determined by reference to SONIA or an international equivalent borrowing rate. Interest on investments is variable based on the distribution received from underlying investments.

Interest rate risk sensitivity

An interest rate sensitivity disclosure has not been included because the investments held by the sub-fund are collective investment schemes, which may invest in interest bearing financial assets, however, information regarding these investments is not available from the ACD/fund managers as at the sub-fund's balance sheet date.

Liquidity risk

31 January 2026

The following table provides a maturity analysis of the sub-fund's financial liabilities:

Within one year:	Distribution payable on income shares	2,958,540	2,705,204
	Other creditors	12,742,340	1,203,433
		<u>15,700,880</u>	<u>3,908,637</u>

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

15 FAIR VALUE HIERARCHY FOR INVESTMENTS

Basis of valuation	31 January 2026		31 January 2025	
	Assets (£)	Liabilities (£)	Assets (£)	Liabilities (£)
Level 1 - Quoted prices	-	-	-	-
Level 2 - Observable market data	458,203,631	-	492,661,079	-
Level 3 - Unobservable data	-	-	-	-
	<u>458,203,631</u>	<u>-</u>	<u>492,661,079</u>	<u>-</u>

The intention of a fair value measurement is to estimate the price at which an asset or liability could be exchanged in the market conditions prevailing at the measurement date. The measurement assumes the exchange is an orderly transaction (that is, it is not a forced transaction, involuntary liquidation or distress sale) between knowledgeable, willing participants on an independent basis.

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities. The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs.

In accordance with FRS102 the sub-fund classifies fair value measurement under the following levels:

Level 1 - Unadjusted quoted price in an active market for an identical instrument;

Level 2 - Valuation techniques using observable inputs other than quoted prices within level 1; and

Level 3 - Valuation techniques using unobservable inputs.

16 POST BALANCE SHEET EVENTS

Since 30 January 2026, the Net Asset Value per share has changed as follows:

	Net Asset Value per share (pence)		
	30 January 2026 ^A	18 May 2026	Movement (%)
A Income	137.80	139.00	0.87%
A Accumulation	148.60	151.60	2.02%
C Income	137.60	138.90	0.94%
D Income	123.20	124.50	1.06%
D Accumulation	135.20	137.70	1.85%

^A These Net Asset Values differ from those in the Comparative Table as they are the quoted Net Asset Values.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the year ended 31 January 2026

Performance to 31 January 2026

	<u>Six months</u>	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Ascot Lloyd 6	8.57%	11.96%	34.00%	36.60%
IA Mixed Investment 40-85% Shares Sector	7.26%	9.79%	29.11%	33.75%

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance summary

The IFSL Ascot Lloyd 6 sub-fund returned 11.96% over the 12 months to 31 January 2026 compared to 9.79% for the sub-fund's performance comparator.

Market review

Markets delivered positive returns over the year, although performance varied across asset classes and regions. Equity markets were generally strong, with emerging markets and Europe among the better performers, while the UK also produced very solid gains. The US market finished the period higher, although returns were more moderate than in some other regions.

Bond markets delivered more modest returns than equities over the period. Government bond returns were relatively low as interest rate expectations changed during the year. However, corporate bond markets performed more strongly, supported by higher income levels and resilient credit conditions.

Sub-fund performance review

The IFSL Ascot Lloyd 6 sub-fund outperformed its performance comparator over the period.

Within fixed income, fund selection was positive overall, with global bond and high yield funds contributing positively relative to their benchmarks.

Across equities, Emerging Markets was the largest positive contributor, reflecting strong relative returns from the underlying funds. Japan also added to performance, supported by exposure to a value-focused strategy. These gains more than offset weaker relative returns from UK and European equity funds. In the UK, exposure to medium and smaller sized companies held back relative returns, while in Europe a bias towards larger, higher quality companies detracted over the period. The Asia Pacific ex Japan allocation also lagged its benchmark. Within US equities, performance was weaker overall, although value-oriented exposure helped limit the relative impact.

The allocation to alternative strategies also added to performance over the period. Returns were supported by diversified absolute return and managed futures strategies, which performed well during periods of market volatility.

Portfolio activity

Changes were made to the portfolios during the year, with activity taking place in the first three quarters. No changes were made during the final quarter of 2025.

In February 2025, portfolios were rebalanced to implement the second and final phase of previously announced asset allocation changes. This included further allocations to alternative investments and the addition of a high yield bond allocation. An additional Emerging Markets equity fund was also introduced.

During the second quarter, changes were made within fixed income and Asian equities. The global bond allocation was adjusted, with the Muzinich Global Tactical Credit fund replaced by the Legal & General Strategic Bond fund to improve diversification within the asset class. Within Asia, the Schroder Asian Income fund was replaced by the Federated Hermes Asia ex Japan Equity fund.

In the third quarter, further changes were made within fixed income. The BlackRock Corporate Bond fund was replaced by the Man Sterling Corporate Bond fund.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the year. Where it is considered unsuitable to use the total expenses paid by each share class in the year to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the year, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the year and the average shares in issue for the pence per share figures.

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 6

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the year the synthetic risk and reward indicator has changed from 5 to 4.

During the year the ACD has issued and cancelled shares as set out below:

	A Income	A Accumulation	C Income
Opening shares in issue at 1 February 2025	<u>2,879,031</u>	<u>187,522,525</u>	<u>124,817,989</u>
Shares issued	84,770	2,925,700	6,898,359
Shares cancelled	(280,177)	(42,069,454)	(16,976,956)
Shares converted	41,281	-	(41,492)
Closing shares in issue at 31 January 2026	<u><u>2,724,905</u></u>	<u><u>148,378,771</u></u>	<u><u>114,697,900</u></u>

	D Accumulation
Opening shares in issue at 1 February 2025	<u>5,155,882</u>
Shares issued	855,057
Shares cancelled	(1,539,020)
Shares converted	-
Closing shares in issue at 31 January 2026	<u><u>4,471,919</u></u>

14 RISK DISCLOSURES

Market price risk sensitivity

A five per cent increase in the market prices of the sub-fund's portfolio would have the effect of increasing the return and net assets by £19,849,817 (2025: £20,685,123). A five per cent decrease would have an equal and opposite effect.

Interest rate risk

31 January 2026
£

31 January 2025
£

The interest rate risk profile of financial assets and liabilities consists of the following:

Financial assets floating rate ^A	3,341,903	19,090,183
Financial assets interest bearing instruments	99,314,899	85,106,122
Financial assets non-interest bearing instruments	320,318,156	329,531,931
Financial liabilities non-interest bearing instruments	(20,679,354)	(3,417,398)
	<u><u>402,295,604</u></u>	<u><u>430,310,838</u></u>

^A Floating rate assets and liabilities comprise bank balances and overdrafts, whose rates are determined by reference to SONIA or an international equivalent borrowing rate. Interest on investments is variable based on the distribution received from underlying investments.

Interest rate risk sensitivity

An interest rate sensitivity disclosure has not been included because the investments held by the sub-fund are collective investment schemes, which may invest in interest bearing financial assets, however, information regarding these investments is not available from the ACD/fund managers as at the sub-fund's balance sheet date.

Liquidity risk

31 January 2026
£

31 January 2025

The following table provides a maturity analysis of the sub-fund's financial liabilities:

Within one year:	Distribution payable on income shares	1,913,406	1,819,483
	Other creditors	18,765,948	1,597,915
		<u><u>20,679,354</u></u>	<u><u>3,417,398</u></u>

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

15 FAIR VALUE HIERARCHY FOR INVESTMENTS

Basis of valuation	31 January 2026		31 January 2025	
	Assets (£)	Liabilities (£)	Assets (£)	Liabilities (£)
Level 1 - Quoted prices	-	-	-	-
Level 2 - Observable market data	396,996,330	-	413,702,463	-
Level 3 - Unobservable data	-	-	-	-
	<u>396,996,330</u>	<u>-</u>	<u>413,702,463</u>	<u>-</u>

The intention of a fair value measurement is to estimate the price at which an asset or liability could be exchanged in the market conditions prevailing at the measurement date. The measurement assumes the exchange is an orderly transaction (that is, it is not a forced transaction, involuntary liquidation or distress sale) between knowledgeable, willing participants on an independent basis.

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities. The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs.

In accordance with FRS102 the sub-fund classifies fair value measurement under the following levels:

Level 1 - Unadjusted quoted price in an active market for an identical instrument;

Level 2 - Valuation techniques using observable inputs other than quoted prices within level 1; and

Level 3 - Valuation techniques using unobservable inputs.

16 POST BALANCE SHEET EVENTS

Since 30 January 2026, the Net Asset Value per share has changed as follows:

	Net Asset Value per share (pence)		
	30 January 2026 ^A	18 May 2026	Movement (%)
A Income	144.10	147.80	2.57%
A Accumulation	154.50	160.20	3.69%
C Income	143.40	147.10	2.58%
D Accumulation	145.20	150.30	3.51%

^A These Net Asset Values differ from those in the Comparative Table as they are the quoted Net Asset Values.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the year ended 31 January 2026

Performance to 31 January 2026

	<u>Six months</u>	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Ascot Lloyd 7	9.72%	12.95%	36.90%	41.58%
IA Flexible Investment Sector	7.93%	10.15%	29.09%	35.35%

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance summary

The IFSL Ascot Lloyd 7 sub-fund returned 12.95% over the 12 months to 31 January 2026 compared to 10.15% for the sub-fund's performance comparator.

Market review

Markets delivered positive returns over the year, although performance varied across asset classes and regions. Equity markets were generally strong, with emerging markets and Europe among the better performers, while the UK also produced very solid gains. The US market finished the period higher, although returns were more moderate than in some other regions.

Bond markets delivered more modest returns than equities over the period. Government bond returns were relatively low as interest rate expectations changed during the year. However, corporate bond markets performed more strongly, supported by higher income levels and resilient credit conditions.

Sub-fund performance review

The IFSL Ascot Lloyd 7 sub-fund outperformed its performance comparator over the period.

Across equities, Emerging Markets was the largest positive contributor, reflecting strong relative returns from the underlying funds. Japan also added to performance, supported by exposure to a value-focused strategy. These gains more than offset weaker relative returns from UK and European equity funds. In the UK, exposure to medium and smaller sized companies held back relative returns, while in Europe a bias towards larger, higher quality companies detracted over the period. The Asia Pacific ex Japan allocation also lagged its benchmark. Within US equities, performance was weaker overall, although value-oriented exposure helped limit the relative impact.

Within fixed income, fund selection was positive overall, with the high yield bond allocation contributing positively relative to its benchmark.

The allocation to alternative strategies also added to performance over the period. Returns were supported by diversified absolute return and managed futures strategies, which performed well during periods of market volatility.

Portfolio activity

Changes were made to the portfolio during the year, with activity taking place in the first three quarters. No changes were made during the final quarter of 2025.

In February 2025, the portfolio was rebalanced to implement the second and final phase of previously announced asset allocation changes. This included the addition of a high yield bond allocation and an additional Emerging Markets equity fund.

During the second quarter, within Asia, the Schroder Asian Income fund was replaced by the Federated Hermes Asia ex Japan Equity fund.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the year. Where it is considered unsuitable to use the total expenses paid by each share class in the year to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the year, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the year and the average shares in issue for the pence per share figures.

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 7

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the year the synthetic risk and reward indicator has changed from a 5 to 4.

Short-term money market investments ^A	39	1,316,443
Cash and bank balances	1,953,020	3,422,548
	<u>1,953,059</u>	<u>4,738,991</u>

^A The short-term money market investments represent the following holdings: 0.31 shares (2025: 5,576 shares) in BlackRock ICS Sterling Liquidity 'Premier' GBP; and 1 share (2025: 546,350 shares) in Federated Hermes Short-Term Sterling Prime '8'.

11 RELATED PARTIES

The ACD is involved in all transactions in the shares of the sub-fund, the aggregate values of which are set out in the statement of change in net assets attributable to shareholders and note 7. Amounts due from/to the ACD in respect of share transactions at the period end are disclosed in notes 8 and 9, respectively. Amounts paid to the ACD or associates in respect of the ACD's periodic charge and other fees are disclosed in note 5. Amounts due to the ACD at the year end are £209,775 (2025: £108,709).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd European Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- The value of purchases transactions was £2,503,541 (2025: £446,701) and sales transactions was £1,048,634 (2025: £764,052).
- Revenue receivable for the year was £105,343 (2025: £103,376) and the outstanding amount was nil (2025: nil).
- The aggregate value of investments held at the year-end was £8,836,525 (2025: £6,668,948).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd US Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- The value of purchases transactions was £4,896,341 (2025: £2,806,126) and sales transactions was £2,578,288 (2025: £5,826,528).
- Revenue receivable for the year was £108,876 (2025: nil) and the outstanding amount was nil (2025: nil).
- The aggregate value of investments held at the year-end was £32,994,080 (2025: £29,594,896).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- The value of purchases transactions was £487,193 (2025: nil) and sales transactions was £6,011,376 (2025: £4,022,922).
- Revenue receivable for the year was £155,516 (2025: £251,895) and the outstanding amount was nil (2025: nil).
- The aggregate value of investments held at the year-end was £8,954,557 (2025: £13,565,782).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity Income 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- The value of purchases transactions was nil (2025: £796,422) and sales transactions was £4,052,408 (2025: £5,733,878).
- Revenue receivable for the year was £370,466 (2025: £587,371) and the outstanding amount was nil (2025: nil).
- The aggregate value of investments held at the year-end was £10,966,815 (2025: £13,757,546).

12 SHARE CLASSES

The share classes in issue for the sub-fund and the annual management charge for each share class is as follows:

A Income / Accumulation	0.38%
C Income	0.13%
D Accumulation	1.03%

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

13 SHAREHOLDERS' FUND RECONCILIATION

During the year the ACD has issued and cancelled shares as set out below:

	A Income	A Accumulation	C Income
Opening shares in issue at 1 February 2025	540,142	34,809,979	44,019,084
Shares issued	555	3,070,821	4,559,594
Shares cancelled	(443,124)	(6,204,211)	(7,494,587)
Closing shares in issue at 31 January 2026	<u>97,573</u>	<u>31,676,589</u>	<u>41,084,091</u>
		D Accumulation	
Opening shares in issue at 1 February 2025		247,539	
Shares issued		109	
Shares cancelled		(41,244)	
Closing shares in issue at 31 January 2026		<u>206,404</u>	

14 RISK DISCLOSURES

Market price risk sensitivity

A five per cent increase in the market prices of the sub-fund's portfolio would have the effect of increasing the return and net assets by £5,545,921 (2025: £5,268,926). A five per cent decrease would have an equal and opposite effect.

Interest rate risk

31 January 2026

31 January 2025

£

£

The interest rate risk profile of financial assets and liabilities consists of the following:

Financial assets floating rate ^A	1,953,059	4,738,991
Financial assets interest bearing instruments	9,321,688	8,998,007
Financial assets non-interest bearing instruments	107,006,822	96,673,192
Financial liabilities non-interest bearing instruments	(5,788,361)	(1,037,624)
	<u>112,493,208</u>	<u>109,372,566</u>

^A Floating rate assets and liabilities comprise bank balances and overdrafts, whose rates are determined by reference to SONIA or an international equivalent borrowing rate. Interest on investments is variable based on the distribution received from underlying investments.

Interest rate risk sensitivity

An interest rate sensitivity disclosure has not been included because the investments held by the sub-fund are collective investment schemes, which may invest in interest bearing financial assets, however, information regarding these investments is not available from the ACD/fund managers as at the sub-fund's balance sheet date.

Liquidity risk

		<u>5,788,361</u>	<u>1,037,624</u>

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

15 FAIR VALUE HIERARCHY FOR INVESTMENTS

Basis of valuation	31 January 2026		31 January 2025	
	Assets (£)	Liabilities (£)	Assets (£)	Liabilities (£)
Level 1 - Quoted prices	-	-	-	-
Level 2 - Observable market data	110,918,424	-	105,378,518	-
Level 3 - Unobservable data	-	-	-	-
	<u>110,918,424</u>	<u>-</u>	<u>105,378,518</u>	<u>-</u>

The intention of a fair value measurement is to estimate the price at which an asset or liability could be exchanged in the market conditions prevailing at the measurement date. The measurement assumes the exchange is an orderly transaction (that is, it is not a forced transaction, involuntary liquidation or distress sale) between knowledgeable, willing participants on an independent basis.

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities. The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs.

In accordance with FRS102 the sub-fund classifies fair value measurement under the following levels:

Level 1 - Unadjusted quoted price in an active market for an identical instrument;

Level 2 - Valuation techniques using observable inputs other than quoted prices within level 1; and

Level 3 - Valuation techniques using unobservable inputs.

16 POST BALANCE SHEET EVENTS

Since 30 January 2026, the Net Asset Value per share has changed as follows:

	Net Asset Value per share (pence)		
	30 January 2026 ^A	18 May 2026	Movement (%)
A Income	150.30	156.20	3.93%
A Accumulation	161.40	169.10	4.77%
C Income	149.70	155.50	3.87%
D Accumulation	144.70	151.40	4.63%

^A These Net Asset Values differ from those in the Comparative Table as they are the quoted Net Asset Values.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the year ended 31 January 2026

Performance to 31 January 2026

	<u>Six months</u>	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Ascot Lloyd 8	12.27%	16.94%	32.44%	29.39%
IA Flexible Investment	7.93%	10.15%	29.09%	35.35%

External Source of Economic Data: Morningstar (A Accumulation - quoted to quoted).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance summary

The IFSL Ascot Lloyd 8 sub-fund returned 16.94% over the 12 months to 31 January 2026 compared to 10.15% for the sub-fund's performance comparator.

Market review

Markets delivered positive returns over the year, although performance varied across asset classes and regions. Equity markets were generally strong, with emerging markets and Europe among the better performers, while the UK also produced very solid gains. The US market finished the period higher, although returns were more moderate than in some other regions.

Sub-fund performance review

The IFSL Ascot Lloyd 8 sub-fund outperformed its performance comparator over the period.

Emerging Markets was the largest positive contributor, reflecting strong relative returns from the underlying funds. Japan also added meaningfully to performance, supported by exposure to a value-focused strategy. Together, these allocations were the main drivers of relative outperformance.

These gains were partly offset by weaker relative returns from UK and European equity funds. In the UK, exposure to medium and smaller sized companies held back relative performance. In Europe, a bias towards larger, higher quality companies detracted over the period. The Asia Pacific ex Japan allocation also lagged its benchmark, while US equity exposure was weaker overall, although value-oriented exposure helped limit the relative impact.

Portfolio activity

Changes were made to the portfolio during the year.

In February 2025, the portfolio was rebalanced to implement the second and final phase of previously announced asset allocation changes. As part of this rebalance, an additional Emerging Markets equity fund was introduced.

During the second quarter, the Schroder Asian Income fund was replaced by the Federated Hermes Asia ex Japan Equity fund. No further changes were made during the remainder of the year.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the year. Where it is considered unsuitable to use the total expenses paid by each share class in the year to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the year, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the year and the average shares in issue for the pence per share figures.

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 8

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. During the year the synthetic risk and reward indicator has remained unchanged.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

6 TAXATION

	31 January 2026	31 January 2025
	£	£
a Analysis of the tax charge for the year		
UK corporation tax at 20% (2025: 20%)	-	-
Total tax charge for the year (see note 6(b))	<u>-</u>	<u>-</u>
b Factors affecting the tax charge for the year		
The taxation assessed for the year is lower (2025: lower) than the standard rate of corporation tax in the UK for an open-ended investment company 20% (2025: 20%). The differences are explained below.		
Net revenue before taxation	147,164	264,367
UK corporation tax at 20% (2025: 20%)	29,433	52,873
Effects of:		
Revenue not subject to taxation	(34,338)	(48,157)
Unrelieved excess management expenses	4,905	(4,716)
Total tax charge for the year (see note 6(a))	<u>-</u>	<u>-</u>
c Provision for deferred taxation		
At 31 January 2026 the sub-fund has deferred tax assets of £12,503 (2025: £7,598) arising from surplus management expenses, which have not been recognised due to uncertainty over the availability of future taxable profits.		

7 DISTRIBUTIONS

	31 January 2026	31 January 2025
	£	£
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim	26,769	87,647
Final	105,463	162,062
Amounts deducted on cancellation of shares	24,620	23,590
Amounts added on issue of shares	(9,684)	(8,929)
Revenue brought forward	(4)	(3)
Distributions	<u>147,164</u>	<u>264,367</u>

8 DEBTORS

^A The short-term money market investments represent the following holdings: 1 share (2025: 701 shares) in BlackRock ICS Sterling Liquidity Premier GBP; and nil shares (2025: 59,919 shares) in Federated Hermes Short-Term Sterling Prime '8'.

11 RELATED PARTIES

The ACD is involved in all transactions in the shares of the sub-fund, the aggregate values of which are set out in the statement of change in net assets attributable to shareholders and note 7. Amounts due from/to the ACD in respect of share transactions at the period end are disclosed in notes 8 and 9, respectively. Amounts paid to the ACD or associates in respect of the ACD's periodic charge and other fees are disclosed in note 5. Amounts due (to)/from the ACD at the period end are £(123,539) (2025: £10,837).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd European Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £559,907 (2025: £604,161) and sales transactions was £452,773 (2025: £419,179).
- b) Revenue receivable for the year was £26,107 (2025: £13,134) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £1,550,976 (2025: £1,272,315).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd US Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £675,398 (2025: £483,260) and sales transactions was £564,954 (2025: £887,636).
- b) Revenue receivable for the year was £7,584 (2025: nil) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £2,190,749 (2025: £2,016,181).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £29,662 (2025: £113,854) and sales transactions was £270,400 (2025: £463,293).
- b) Revenue receivable for the year was £12,429 (2025: £13,802) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £730,887 (2025: £900,511).

During the year ended 31 January 2026, the sub-fund held IFSL Ascot Lloyd UK Equity Income 'A', which is a related party of the ACD, Investment Fund Services Limited. The holdings and the associated transactions in the current and previous accounting years were as follows:

- a) The value of purchases transactions was £127,609 (2025: £27,986) and sales transactions was £241,750 (2025: £331,168).
- b) Revenue receivable for the year was £29,203 (2025: £35,660) and the outstanding amount was nil (2025: nil).
- c) The aggregate value of investments held at the year-end was £901,680 (2025: £920,525).

12 SHARE CLASSES

The share classes in issue for the sub-fund and the annual management charge for each share class is as follows:

A Income / Accumulation	0.38%
C Income	0.13%
D Accumulation	1.03%

IFSL ASCOT LLOYD OEIC
IFSL ASCOT LLOYD 8

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

13 SHAREHOLDERS' FUND RECONCILIATION

During the year the ACD has issued and cancelled shares as set out below:

	A Income ^A	A Accumulation	C Income
Opening shares in issue at 1 February 2025	15,112	6,069,581	3,150,841
Shares issued	-	537,147	703,146
Shares cancelled	(15,112)	(2,629,655)	(977,691)
Closing shares in issue at 31 January 2026	-	3,977,073	2,876,296
		D Accumulation	
Opening shares in issue at 1 February 2025		100	
Shares issued		60,697	
Closing shares in issue at 31 January 2026		60,797	

^A All shares in this share class were redeemed on 22 December 2025.

14 RISK DISCLOSURES

Market price risk sensitivity

A five per cent increase in the market prices of the sub-fund's portfolio would have the effect of increasing the return and net assets by £547,629 (2025: £614,507). A five per cent decrease would have an equal and opposite effect.

Interest rate risk

31 January 2026

31 January 2025

£

£

The interest rate risk profile of financial assets and liabilities consists of the following:

Financial assets floating rate ^A	55,137	286,895
Financial assets interest bearing instruments	1	313,666
Financial assets non-interest bearing instruments	11,341,238	12,183,159
Financial liabilities floating rate ^A	-	(15,243)
Financial liabilities non-interest bearing instruments	(401,780)	(57,108)
	<u>10,994,596</u>	<u>12,711,369</u>

^A Floating rate assets and liabilities comprise bank balances and overdrafts, whose rates are determined by reference to SONIA or an international equivalent borrowing rate. Interest on investments is variable based on the distribution received from underlying investments.

Interest rate risk sensitivity

An interest rate sensitivity disclosure has not been included because the investments held by the sub-fund are collective investment schemes, which may invest in interest bearing financial assets, however, information regarding these investments is not available from the ACD/fund managers as at the sub-fund's balance sheet date.

The following table provides a maturity analysis of the sub-fund's financial liabilities:

Within one year:	Distribution payable on income shares	46,223	56,697
	Bank overdrafts	-	15,243
	Other creditors	355,557	411
		<u>401,780</u>	<u>72,351</u>

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 January 2026

15 FAIR VALUE HIERARCHY FOR INVESTMENTS

Basis of valuation	31 January 2026		31 January 2025	
	Assets (£)	Liabilities (£)	Assets (£)	Liabilities (£)
Level 1 - Quoted prices	-	-	-	-
Level 2 - Observable market data	10,952,573	-	12,290,132	-
Level 3 - Unobservable data	-	-	-	-
	<u>10,952,573</u>	<u>-</u>	<u>12,290,132</u>	<u>-</u>

The intention of a fair value measurement is to estimate the price at which an asset or liability could be exchanged in the market conditions prevailing at the measurement date. The measurement assumes the exchange is an orderly transaction (that is, it is not a forced transaction, involuntary liquidation or distress sale) between knowledgeable, willing participants on an independent basis.

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities. The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs.

In accordance with FRS102 the sub-fund classifies fair value measurement under the following levels:

Level 1 - Unadjusted quoted price in an active market for an identical instrument;

Level 2 - Valuation techniques using observable inputs other than quoted prices within level 1; and

Level 3 - Valuation techniques using unobservable inputs.

16 POST BALANCE SHEET EVENTS

Since 30 January 2026, the Net Asset Value per share has changed as follows:

	Net Asset Value per share (pence)		
	30 January 2026 ^A	18 May 2026	Movement (%)
A Income	115.40	115.40	0.00%
A Accumulation	162.90	173.00	6.20%
C Income	155.90	164.00	5.20%
D Accumulation	126.60	134.20	6.00%

^A These Net Asset Values differ from those in the Comparative Table as they are the quoted Net Asset Values.
