AUTHORISED STATUS

IFSL Avellemy OEIC (the Company) is an open-ended investment company (OEIC) with variable capital incorporated under the OEIC Regulations. The Company is a non-UCITS Retail Scheme as defined in the Collective Investment Schemes Sourcebook (COLL) and the Investment Funds Sourcebook (FUND) and is also an umbrella company for the purposes of the OEIC Regulations. The Company is incorporated in England and Wales with registered number IC001126. The Company was authorised by an order made by the FCA with effect from 12 October 2018 with the Product Reference Number (PRN) 816795.

The Company currently has six sub-funds: IFSL Avellemy 3; IFSL Avellemy 4; IFSL Avellemy 5; IFSL Avellemy 6; IFSL Avellemy 7; and IFSL Avellemy 8.

Shareholders of the sub-funds do not have any proprietary interest in the underlying assets of the Company and will not be liable for the debts of the Company. A sub-fund is not a legal entity. If the assets attributable to a sub-fund were insufficient to meet its liabilities the shortfall will not be met out of the assets attributable to one or more other sub-funds of the Company. The sub-funds are segregated by law under the Protected Cell Regime.

GENERAL INFORMATION

IFSL Avellemy 3

Investment objective (during the accounting period to 1 July 2024)

The investment objective of the sub-fund is to seek a combination of capital growth and income. This will be achieved whilst aiming to maintain the sub-fund's risk rating classification as set by an independent asset allocator.

The sub-fund has a risk rating classification of '3'.

The independent asset allocator has a risk rating range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk. The independent risk rating is separate to the Synthetic Risk and Reward Indicator (SRRI).

As the sub-fund is managed within the asset allocation limits of the risk rating this may limit the potential for capital growth and income.

Investment objective (from 2 July 2024)

The aim of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '3'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy (during the accounting period to 1 July 2024)

The sub-fund will be actively managed on a low risk strategy and assets may be allocated to any geographical sector through gaining exposure to a range of asset classes by investing at least 70% in collective investment schemes. The asset class exposure is likely to have a higher percentage invested in lower and medium-risk investments such as cash, bonds and property, with lower exposure to higher-risk investments such as shares in companies, usually below 35%.

The sub-fund may also invest directly in cash, shares in companies, fixed interest securities (including government bonds), corporate bonds and structured products.

The sub-fund will be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the sub-fund both generally and in relation to its strategic objective.

Whilst the sub-fund itself will not use derivatives, the collective investment schemes purchased may have the ability to use derivatives to varying degrees.

The sub-fund may invest scheme property in units/shares of schemes managed, operated or administered by the ACD (or one of its associates).

The sub-fund will not maintain a direct interest in any immoveable property or tangible moveable property.

GENERAL INFORMATION

IFSL Avellemy 3 (continued)

Investment policy (from 2 July 2024)

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the sub-fund is likely to be exposed to a higher percentage of lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund will have lower exposure to higher-risk asset types such as shares in companies.

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

Investment strategy (from 2 July 2024)

The sub-fund's investments are low risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- · assessment of the capabilities of the manager of the Investment Fund; and
- view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance (during the accounting period to 1 July 2024)

The Investment Manager uses the MSCI Multi-Asset Dynamic Planner 3 index as a comparator for risk analysis purposes. This index combines the performance of various market indices. The sub-fund's risk and return characteristics most closely align with the allocation of this index. To assess the performance of the sub-fund, you may wish to compare it with this index.

The Investment Manager used the MSCI Multi-Asset Dynamic Planner 3 index as a comparator for risk analysis purposes. During this period, this index was offered as a comparator against which, performance could be assessed.

Assessing performance (from 2 July 2024)

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Mixed Investment 0-35% shares sector. The sub-fund is not managed to a benchmark, however you may want to assess the sub-fund's performance compared to the performance of this sector.

GENERAL INFORMATION

IFSL Avellemy 4

Investment objective (during the accounting period to 1 July 2024)

The investment objective of the sub-fund is to seek a combination of capital growth and income. This will be achieved whilst aiming to maintain the sub-fund's risk rating classification as set by an independent asset allocator.

The sub-fund has a risk rating classification of '4'.

The independent asset allocator has a risk rating range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk. The independent risk rating is separate to the Synthetic Risk and Reward Indicator (SRRI).

As the sub-fund is managed within the asset allocation limits of the risk rating this may limit the potential for capital growth and income.

Investment objective (from 2 July 2024)

The aim of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '4'.

- view of the market and economic outlook.

GENERAL INFORMATION

IFSL Avellemy 5 (continued)

Investment strategy (from 2 July 2024) (continued)

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance (during the accounting period to 1 July 2024)

The Investment Manager uses the MSCI Multi-Asset Dynamic Planner 5 index as a comparator for risk analysis purposes. This index combines the performance of various market indices. The sub-fund's risk and return characteristics most closely align with the allocation of this index. To assess the performance of the sub-fund, you may wish to compare it with this index.

The Investment Manager used the MSCI Multi-Asset Dynamic Planner 5 index as a comparator for risk analysis purposes. During this period, this index was offered as a comparator against which, performance could be assessed.

Assessing performance (from 2 July 2024)

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Mixed Investment 40-85% shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

Please note both IFSL Avellemy 5 and IFSL Avellemy 6 use the IA Mixed Investment 40-85% shares sector as a comparison benchmark however IFSL Avellemy 5 is a lower risk fund. Investors should be considerate of the different risk profiles when comparing performance against the benchmark and reaching a conclusion on its return (which is the money made or lost on an investment). Over the longer-term, lower risk profile funds would be expected to be less volatile and as a result potentially deliver a reduced return versus a higher risk alternative.

IFSL Avellemy 6

Investment objective (during the accounting period to 1 July 2024)

The investment objective of the sub-fund is to seek a combination of capital growth and income. This will be achieved whilst aiming to maintain the sub-fund's risk rating classification as set by an independent asset allocator.

The sub-fund has a risk rating classification of '6'.

The independent asset allocator has a risk rating range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk. The independent risk rating is separate to the Synthetic Risk and Reward Indicator (SRRI).

As the sub-fund is managed within the asset allocation limits of the risk rating this may limit the potential for capital growth and income.

Investment objective (from 2 July 2024)

The aim of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '6'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy (during the accounting period to 1 July 2024)

The sub-fund will be actively managed on a medium risk strategy and assets may be allocated to any geographical sector through gaining exposure to a range of asset classes by investing at least 70% in collective investment schemes. The asset class exposure is likely to include higher-risk investments such as shares in companies with typically a lower exposure to lower and medium-risk investments such as cash, bonds and property.

GENERAL INFORMATION

IFSL Avellemy 6 (continued)

Investment policy (during the accounting period to 1 July 2024) (continued)

The sub-fund may also invest directly in cash, shares in companies, fixed interest securities (including government bonds), corporate bonds and structured products.

The sub-fund will be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the sub-fund both generally and in relation to its strategic objective.

Whilst the sub-fund itself will not use derivatives, the collective investment schemes purchased may have the ability to use derivatives to varying degrees.

The sub-fund may invest scheme property in units/shares of schemes managed, operated or administered by the ACD (or one of its associates).

The sub-fund will not maintain a direct interest in any immoveable property or tangible moveable property.

Investment policy (from 2 July 2024)

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the sub-fund is likely to be exposed to a higher percentage of higher-risk asset types such as shares in companies.

The sub-fund will have lower exposure to lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

Investment strategy (from 2 July 2024)

The sub-fund's investments are medium risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- assessment of the capabilities of the manager of the Investment Fund; and

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

GENERAL INFORMATION

IFSL Avellemy 6 (continued)

Assessing performance (during the accounting period to 1 July 2024)

The Investment Manager uses the MSCI Multi-Asset Dynamic Planner 6 index as a comparator for risk analysis purposes. This index combines the performance of various market indices. The sub-fund's risk and return characteristics most closely align with the allocation of this index. To assess the performance of the sub-fund, you may wish to compare it with this index.

The investment Manager used the MSCI Multi-Asset Dynamic Planner 6 index as a comparator for risk analysis purposes. During this period, this index was offered as a comparator against which, performance could be assessed.

Assessing performance (from 2 July 2024)

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Mixed Investment 40-85% shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

Please note both IFSL Avellemy 5 and IFSL Avellemy 6 use the IA Mixed Investment 40-85% shares sector as a comparison benchmark however IFSL Avellemy 6 is a higher risk fund. Investors should be considerate of the different risk profiles when comparing performance against the benchmark and reaching a conclusion on its return (which is the money made or lost on an investment). Over the longer-term, higher risk profile funds would be expected to be more volatile and as a result potentially deliver a higher return versus a lower risk alternative.

IFSL Avellemy 7

Investment objective (during the accounting period to 1 July 2024)

The investment objective of the sub-fund is to seek a combination of capital growth and income. This will be achieved whilst aiming to maintain the sub-fund's risk rating classification as set by an independent asset allocator.

The sub-fund has a risk rating classification of '7'.

The independent asset allocator has a risk rating range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk. The independent risk rating is separate to the Synthetic Risk and Reward Indicator (SRRI).

As the sub-fund is managed within the asset allocation limits of the risk rating this may limit the potential for capital growth and income.

Investment objective (from 2 July 2024)

The aim of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '7'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy (during the accounting period to 1 July 2024)

The sub-fund will be actively managed on a medium to high risk strategy and assets may be allocated to any geographical sector through investment in a range of asset classes by investing at least 70% in collective investment schemes. The asset class exposure is likely to include higher-risk investments such as shares in companies with lower exposure to lower and medium-risk investments such as bonds and property.

The sub-fund may also invest directly in cash, shares in companies, fixed interest securities (including government bonds), corporate bonds and structured products.

The sub-fund will be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the sub-fund both generally and in relation to its strategic objective.

Whilst the sub-fund itself will not use derivatives, the collective investment schemes purchased may have the ability to use derivatives to varying degrees.

GENERAL INFORMATION

IFSL Avellemy 7 (continued)

Investment policy (during the accounting period to 1 July 2024) (continued)

The sub-fund may invest scheme property in units/shares of schemes managed, operated or administered by the ACD (or one of its associates).

The sub-fund will not maintain a direct interest in any immoveable property or tangible moveable property.

Investment policy (from 2 July 2024)

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the sub-fund is likely to be exposed to a higher percentage of higher-risk asset types such as shares in companies.

The sub-fund will have lower exposure to lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

Investment strategy (from 2 July 2024)

The sub-fund's investments are medium to high risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- assessment of the capabilities of the manager of the Investment Fund; and
- · view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance (during the accounting period to 1 July 2024)

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Flexible Investment sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

The investment Manager used the MSCI Multi-Asset Dynamic Planner 7 index as a comparator for risk analysis purposes. During this period, this index was offered as a comparator against which, performance could be assessed.

GENERAL INFORMATION

IFSL Avellemy 7 (continued)

Assessing performance (from 2 July 2024)

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Flexible Investment sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

Please note both IFSL Avellemy 7 and IFSL Avellemy 8 use the IA Flexible Investment sector as a comparison benchmark however IFSL Avellemy 7 is a lower risk fund. Investors should be considerate of the different risk profiles when comparing performance against the benchmark and reaching a conclusion on its return (which is the money made or lost on an investment). Over the longer-term, lower risk profile funds would be expected to be less volatile and as a result potentially deliver a reduced return versus a higher risk alternative.

From time to time, due to the nature of the IA Flexible Investment sector, the sub-fund may have an asset allocation which is different to the average of the sector. This variable nature of the sector should be taken into consideration when comparing the performance of the sub-fund.

IFSL Avellemy 8

Investment objective (during the accounting period to 1 July 2024)

The investment objective of the sub-fund is to seek a combination of capital growth and income. This will be achieved whilst aiming to maintain the sub-fund's risk rating classification as set by an independent asset allocator.

The sub-fund has a risk rating classification of '8'.

The independent asset allocator has a risk rating range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk. The independent risk rating is separate to the Synthetic Risk and Reward Indicator (SRRI).

As the sub-fund is managed within the asset allocation limits of the risk rating this may limit the potential for capital growth and income.

Investment objective (from 2 July 2024)

The aim of the sub-fund is to increase the value of an investment over a minimum of 5 years. The sub-fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments, such as interest from bonds and dividends from shares. This will be achieved whilst aiming to maintain a risk rating classification of '8'.

The sub-fund's risk rating is confirmed by an independent external agency who operate a range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

The sub-fund is managed to operate within the limits of the risk rating, which may limit the potential for capital growth and income.

Investment policy (during the accounting period to 1 July 2024)

The sub-fund will be actively managed on a high risk strategy and assets may be allocated to any geographical sector through investment in a range of asset classes by investing at least 70% in collective investment schemes. The asset class exposure is likely to include higher-risk investments such as shares in companies with lower exposure to lower- and medium-risk investments such as bonds and property.

The sub-fund may also invest directly in cash, shares in companies, fixed interest securities (including government bonds), corporate bonds and structured products.

The sub-fund will be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the sub-fund both generally and in relation to its strategic objective.

Whilst the sub-fund itself will not use derivatives, the collective investment schemes purchased may have the ability to use derivatives to varying degrees.

The sub-fund may invest scheme property in units/shares of schemes managed, operated or administered by the ACD (or one of its associates).

The sub-fund will not maintain a direct interest in any immoveable property or tangible moveable property.

GENERAL INFORMATION

IFSL Avellemy 8 (continued)

Investment policy (from 2 July 2024)

The sub-fund is actively managed, which means the Investment Manager selects which investments to buy or sell, and when.

The sub-fund will invest at least 70% in collective investment schemes, investment trusts and exchange traded products, i.e. ETFs/ETCs (collectively "Investment Funds"), with no minimum or maximum exposure to any geographic region. This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the sub-fund is likely to be exposed to a higher percentage of higher-risk asset types such as shares in companies.

The sub-fund will have lower exposure to lower and medium-risk asset types, such as bonds (which are loans issued by companies and governments), cash, and money market instruments (which are short-term loans).

The sub-fund may also have exposure to alternative asset types such as property, infrastructure, commodities (e.g. gold) and absolute return funds.

The sub-fund may also invest up to 30% directly in shares in companies, bonds (including both corporate and government bonds) and structured products.

The sub-fund may hold up to 10% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio and in pursuit of the sub-fund's investment objective.

Whilst the sub-fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

Investment strategy (from 2 July 2024)

The sub-fund's investments are high risk and it primarily operates a fund of funds approach (which is a fund that invests in other funds). The sub-fund seeks to generate investment growth, through a diversified allocation to a range of asset types, within the scope of the investment policy.

The Investment Manager will assess the appropriate weightings for each asset type and each Investment Fund based on their:

- view of the risk, return and other characteristics of the asset type;
- · assessment of the capabilities of the manager of the Investment Fund; and
- view of the market and economic outlook.

Both passive (where the Investment Fund mirrors a market index) and active Investment Funds (which do not mirror an index) will be considered for inclusion in the sub-fund.

These asset types and Investment Funds will be weighted in such a way that achieves the appropriate risk rating as confirmed by an independent external agency.

Assessing performance (during the accounting period to 1 July 2024)

The Investment Manager uses the MSCI Multi-Asset Dynamic Planner 8 index as a comparator for risk analysis purposes. This index combines the performance of various market indices. The sub-fund's risk and return characteristics most closely align with the allocation of this index. To assess the performance of the sub-fund, you may wish to compare it with this index.

The Investment Manager used the MSCI Multi-Asset Dynamic Planner 8 index as a comparator for risk analysis purposes. During this period, this index was offered as a comparator against which, performance could be assessed.

Assessing performance (from 2 July 2024)

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The sub-fund's investment policy most closely aligns with the IA Flexible Investment sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

GENERAL INFORMATION

IFSL Avellemy 8 (continued)

Assessing performance (from 2 July 2024) (continued)

Please note both IFSL Avellemy 7 and IFSL Avellemy 8 use the IA Flexible Investment sector as a comparison benchmark however IFSL Avellemy 8 is a higher risk fund. Investors should be considerate of the different risk profiles when comparing performance against the benchmark and reaching a conclusion on its return (which is the money made or lost on an investment). Over the longerterm, higher risk profile funds would be expected to be more volatile and as a result potentially deliver a higher return versus a lower risk alternative.

From time to time, due to the nature of the IA Flexible Investment sector, the sub-fund may have an asset allocation which is different to the average of the sector. This variable nature of the sector should be taken into consideration when comparing the performance of the sub-fund.

Rights and terms attached to each share class

A share of each class represents a proportional entitlement to the assets of the sub-fund. The allocation of income and taxation and the rights of each share in the event that a sub-fund is wound up are on the same proportional basis.

Task force on climate-related financial disclosures

A statement of the climate-related financial disclosures is published on the website https://www.ifslfunds.com/tcfd-reporting.

Changes in prospectus

On 2 July 2024, there was material changes to the prospectus as follows:

- The investment objective for each sub-fund was updated;
- The investment policy for each sub-fund was updated;
- The assesing performance section for each sub-fund was updated; and
- An investment strategy was introduced for each sub-fund.

The changes made in the prospectus are detailed in the General Information section above.

Up to date Key Investor Information Documents, Prospectus and Long Reports and Financial Statements for any fund within the ACD's range, can be requested by the investor at any time.

Cross holdings

The sub-funds of the Company do not hold shares in other sub-funds of the Company.

GENERAL INFORMATION

Leverage

In accordance with the Alternative Investment Fund Manager Directive (AIFMD) we are required to disclose the 'leverage' of the sub-funds. Leverage is defined as any method by which a sub-fund increases its exposure through borrowing or the use of derivatives. 'Exposure' is defined in two ways: 'gross method; and 'commitment method'. The sub-funds must not exceed maximum exposures under both methods. 'Gross method' exposure is calculated as the sum of all positions of the sub-funds (both positive and negative), that is, all eligible assets, liabilities and derivatives, including derivatives held for risk reduction purposes. 'Commitment method' is also calculated as the sum of all positions of the sub-funds (both positive and negative), but after netting off any derivative and security positions as specified by AIFMD rules.

The maximum level of leverage which may be employed on behalf of the sub-funds when calculated in accordance with the gross method is 210%.

The maximum level of leverage which may be employed on behalf of the sub-funds when calculated in accordance with the commitment method is 110%.

The total amount of leverage, and the utilisation of the maximum level of leverage, calculated as at 31 July 2024, is as follows:

Sub-fund Name	Gross	Gross Method		ent Method
	Total	Utilisation	Total	Utilisation
IFSL Avellemy 3	77.93%	37.11%	77.93%	70.85%
IFSL Avellemy 4	86.24%	41.07%	86.24%	78.40%
IFSL Avellemy 5	89.73%	42.73%	89.73%	81.57%
IFSL Avellemy 6	92.15%	43.88%	92.15%	83.77%
IFSL Avellemy 7	94.25%	44.88%	94.25%	85.68%
IFSL Avellemy 8	94.46%	44.98%	94.46%	85.87%

The total amount of leverage, and the utilisation of the maximum level of leverage, calculated as at 31 January 2024, is as follows:

Sub-fund Name	Gross	Commitment Method		
	Total	Utilisation	Total	Utilisation
IFSL Avellemy 3	76.81%	36.58%	76.81%	69.83%
IFSL Avellemy 4	81.85%	38.98%	81.85%	74.41%
IFSL Avellemy 5	85.42%	40.68%	85.42%	77.65%
IFSL Avellemy 6	87.89%	41.85%	87.89%	79.90%
IFSL Avellemy 7	94.29%	44.90%	94.29%	85.72%
IFSL Avellemy 8	95.37%	45.41%	95.37%	86.70%

AUTHORISED INVESTMENT MANAGER'S REPORT - SUMMARY OF THE MARKETS

for the six month period ended 31 July 2024

Market review

Global stock markets registered strong gains in the six months to the end of July 2024, amid a resilient US economy and ongoing enthusiasm around artificial intelligence (AI). The technology sector, which is a key component of the US stock market, continued its ascent on the prospects for AI technologies over the bulk of the six months. The equity markets of Asia-pacific, the UK and Japan also delivered positive returns over the period. Following a robust start to the period Eurozone equities moved lower moving into July as we saw increased market uncertainty due to the announcement of parliamentary elections in France and dwindling expectations for steep interest rate cuts from the European Central Bank (ECB).

On that topic, the timing and extent of interest rates cuts by central banks globally has been a key focus for investors so far in 2024. Sweden's Riksbank was one of the first of the developed market central banks to cut interest rates in May, quickly followed by the ECB, who cut their base rate of interest in June, but have held firm since.

Given that the key central banks in the US Federal Reserve and the Bank of England kept their interest rates unchanged over the period, it was another relatively difficult one for most fixed income assets. Sentiment towards bonds did improve in July as economic uncertainty increased given weaker than expected US employment data. This led to a volatile month across equity markets and boosted returns in the period from US government bonds and other sovereign debt markets around the developed world.

Avellemy Limited 20 August 2024

AUTHORISED CORPORATE DIRECTOR'S STATEMENT

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

Allan Hamer Director Helen Redmond

1. Leamo

Investment Fund Services Limited 26 September 2024

NOTES TO THE INTERIM FINANCIAL STATEMENTS

for the six month period ended 31 July 2024

Basis for preparation

The interim financial statements have been prepared in compliance with Financial Reporting Standard (FRS) 102 and in accordance with the Statement of Recommended Practice (SORP) for UK Authorised Funds issued by the Investment Management Association (renamed to the Investment Association) in May 2014 and amended in June 2017.

The interim financial statements are prepared in sterling, which is the functional currency of the sub-funds. Monetary amounts in these financial statements are rounded to the nearest pound.

The interim financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

Accounting policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 January 2024 and are described in those annual financial statements.

The investments of the sub-funds have been valued at their fair value at 12 noon on 31 July 2024.

^A Launch period ended 13 May 2019.

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance statement

The sub-fund's A Accumulation shares returned 3.67% over the six month period to 31 July 2024, compared to a return of 3.73% for the sub-fund's benchmark*

Market review

It has been a strong six-months for equity markets, with particular success enjoyed by companies whose business models are linked to the development of artificial intelligence (AI) technology. In addition, emerging market and Asian equities have enjoyed a relative resurgence following a difficult year in 2023, and the UK equity market has performed well despite its limited exposure to the AI theme.

Fixed income assets enjoyed a more muted six-months although interest rate cuts from some European central banks later in the period were a tailwind, as were increasing fears of an economic slowdown in July. This caused bond yields* to fall and correspondingly, prices of fixed income assets to rise through the month. Overall, economic data continues to paint a mixed picture on the health of global growth, which had left central bankers reluctant to loosen monetary policy* too soon. This narrative is slowly changing, and a number of key central banks have begun to bring interest rates down, which should be supportive of growth in the future.

Sub-fund performance review

The sub-fund outperformed its benchmark over the period, driven by strong relative performance across most of our underlying manager allocations.

Notable amongst these was outperformance across key fixed income sectors including government bonds, index-linked government bonds and international bonds, which were particularly impactful for lower risk portfolios.

In addition, key equity allocations in the UK and the US both outperformed reference benchmarks in a period of strong absolute returns. The sub-fund's Japanese allocation also outperformed its comparator sector by 2.7%, albeit this only had a fractional positive contribution due to low absolute exposure to Japanese equities in this sub-fund.

Portfolio activity

The investment managers added a US value proposition within the IFSL Avellemy US Equity fund, into which the sub-fund invests. A mandate run by BNY Mellon providing US equity income exposure was also added, to bring the sector exposure of the IFSL Avellemy US Equity fund more in line with that of the US market, and take profit from positions which had outperformed, notably in the technology sector.

Benchmark change

From 2 July 2024 the benchmark for the sub-fund changed from the MSCI Dynamic Planner 3 index to the Investment Association (IA) Mixed Investment 0-35% Shares sector. Benchmark performance numbers referred to in this commentary therefore represent a combination of returns achieved via the MSCI Dynamic Planner index to 1 July 2024 and the IA sector from 2 July 2024.

The primary reason for this change is to represent comparative performance of our sub-fund more accurately versus alternatives that clients might have selected, rather than a comparator that is intended to inform investment management, i.e. MSCI Dynamic Planner.

The change does not reflect any changes to the ongoing management of the sub-fund: Avellemy will continue to manage our strategic asset allocation with reference to MSCI Dynamic Planner's risk levels as we do now. We are simply comparing the subsequent performance with benchmarks that better represent alternative investments a client might have considered alongside Avellemy. Neither does the change of benchmark affect the charges or terms and conditions of the sub-fund in any way. The Prospectus and KIID have been updated to reflect the change.

^B Prior to 2 July 2024, the sub-fund's performance was assessed against the MSCI Multi-Asset Dynamic Planner 3 index.

Explanation of terms*

Benchmark – comparator for performance purposes.

Yield - the income from an investment, usually stated as a percentage of the value of the investment.

Monetary policy - action that a country's central bank or government can take to influence how much money is in the economy and how much it costs to borrow. Tight monetary policy aims to slow down a growing economy by increasing interest rates. Loose monetary policy aims to expand or grow an economy by lowering interest rates.

A Opening net asset value per share on 19 July 2021.

B The return after charges is calculated using the underlying investments bid prices.

C On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^D These figures have been annualised.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the period. Where it is considered unsuitable to use the total expenses paid by each share class in the period to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

^B On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^C These figures have been annualised.

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

Lower risk	ver risk Higher					Higher risk
←						
Typically lower rew	<i>ı</i> ards				Туріс	cally higher rewards
1	2	3	4	5	6	7

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance statement

The sub-fund's A Accumulation shares returned 4.97% over the six month period to 31 July 2024, compared to a return of 5.15% for the sub-fund's benchmark*.

Market review

It has been a strong six-months for equity markets, with particular success enjoyed by companies whose business models are linked to the development of artificial intelligence (AI) technology. In addition, emerging market and Asian equities have enjoyed a relative resurgence following a difficult year in 2023, and the UK equity market has performed well despite its limited exposure to the AI theme.

Fixed income assets enjoyed a more muted six-months although interest rate cuts from some European central banks later in the period were a tailwind, as were increasing fears of an economic slowdown in July. This caused bond yields* to fall and correspondingly, prices of fixed income assets to rise through the month. Overall, economic data continues to paint a mixed picture on the health of global growth, which had left central bankers reluctant to loosen monetary policy* too soon. This narrative is slowly changing, and a number of key central banks have begun to bring interest rates down, which should be supportive of growth in the future.

Sub-fund performance review

The sub-fund underperformed its benchmark over the period, despite most underlying manager allocations delivering positive relative performance.

Notable amongst these was outperformance across key fixed income sectors including government bonds, index-linked government bonds and international bonds, which were particularly impactful for lower risk portfolios.

In addition, key equity allocations in the UK and the US both outperformed reference benchmarks in a period of strong absolute returns. The sub-fund's Japanese and European allocations also outperformed their comparator sectors by 2.7% and 2% respectively providing a tailwind to relative returns.

Key negative drivers to relative returns over the period were the benchmark's allocation to equity of larger companies versus our portfolio, which has a more blended allocation across a range of underlying companies within the equity portfolio. In addition, underperformance of our Asian equity allocation contributed to the relative underperformance in the period.

Portfolio activity

The investment managers amended their Asian and US equity allocations over the period.

They replaced Veritas Asian fund with Stewart Investors Asia Pacific Leaders Sustainability fund. This change had the effect of decreasing the portfolio's allocation to China and increasing the weighting to Indian equities.

The investment managers added a US value proposition within the IFSL Avellemy US Equity fund, into which the sub-fund invests. A mandate run by BNY Mellon providing US equity income exposure was also added, to bring the sector exposure of the IFSL Avellemy US Equity fund more in line with that of the US market, and take profit from positions which had outperformed, notably in the technology sector.

^B Prior to 2 July 2024, the sub-fund's performance was assessed against the MSCI Multi-Asset Dynamic Planner 4 index.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the six month period ended 31 July 2024

Investment commentary (continued)

Benchmark change

From 2 July 2024 the benchmark for the sub-fund changed from the MSCI Dynamic Planner 4 index to the Investment Association (IA) Mixed Investment 20-60% Shares sector. Benchmark performance numbers referred to in this commentary therefore represent a combination of returns achieved via the MSCI Dynamic Planner index to 1 July 2024 and the IA sector from 2 July 2024.

The primary reason for this change is to represent comparative performance of our sub-fund more accurately versus alternatives that clients might have selected, rather than a comparator that is intended to inform investment management, i.e. MSCI Dynamic Planner.

The change does not reflect any changes to the ongoing management of the sub-fund: Avellemy will continue to manage our strategic asset allocation with reference to MSCI Dynamic Planner's risk levels as we do now. We are simply comparing the subsequent performance with benchmarks that better represent alternative investments a client might have considered alongside Avellemy. Neither does the change of benchmark affect the charges or terms and conditions of the sub-fund in any way. The Prospectus and KIID have been updated to reflect the change.

Avellemy Limited 20 August 2024

Explanation of terms*

Benchmark - comparator for performance purposes.

Yield - the income from an investment, usually stated as a percentage of the value of the investment.

Monetary policy - action that a country's central bank or government can take to influence how much money is in the economy and how much it costs to borrow. Tight monetary policy aims to slow down a growing economy by increasing interest rates. Loose monetary policy aims to expand or grow an economy by lowering interest rates.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the period. Where it is considered unsuitable to use the total expenses paid by each share class in the period to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

^B On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^C These figures have been annualised.

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

Lower risk					Higher risk	
						
Typically lower rew	vards				Туріс	cally higher rewards
1	2	3	4	5	6	7

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance statement

The sub-fund's A Accumulation shares returned 6.49% over the six month period to 31 July 2024, compared to a return of 6.59% for the sub-fund's benchmark*.

Market review

It has been a strong six-months for equity markets, with particular success enjoyed by companies whose business models are linked to the development of artificial intelligence (AI) technology. In addition, emerging market and Asian equities have enjoyed a relative resurgence following a difficult year in 2023, and the UK equity market has performed well despite its limited exposure to the AI theme.

Fixed income assets enjoyed a more muted six-months although interest rate cuts from some European central banks later in the period were a tailwind, as were increasing fears of an economic slowdown in July. This caused bond yields* to fall and correspondingly, prices of fixed income assets to rise through the month. Overall, economic data continues to paint a mixed picture on the health of global growth, which had left central bankers reluctant to loosen monetary policy* too soon. This narrative is slowly changing, and a number of key central banks have begun to bring interest rates down, which should be supportive of growth in the future.

Sub-fund performance review

The sub-fund underperformed its benchmark over the period, despite most underlying manager allocations delivering positive relative performance.

Notable amongst these was outperformance across key fixed income sectors including government bonds, index-linked government bonds and international bonds.

In addition, key equity allocations in the UK and the US both outperformed reference benchmarks in a period of strong absolute returns. The sub-fund's Japanese and European allocations also outperformed their comparator sectors by 2.7% and 2% respectively providing a tailwind to relative returns.

Key negative drivers to relative returns over the period were the benchmark's allocation to equity of larger companies versus our portfolio, which has a more blended allocation across a range of underlying companies within the equity portfolio. In addition, underperformance of our Asian and emerging market equity allocations contributed to the relative underperformance in the period.

Portfolio activity

The investment managers amended their Asian, emerging market and US equity allocations over the period.

Firstly, they replaced the Veritas Asian fund with Stewart Investors Asia Pacific Leaders Sustainability fund. This change had the effect of decreasing the portfolio's allocation to China and increasing the weighting to Indian equities.

They also exited the Schroder Global Emerging Markets fund in the period, replacing it with the Artemis Smart GARP Global Emerging Market fund to modify the exposure of the blend, giving greater prominence to companies deemed to be trading cheaply relative to their fundamental strength.

The investment managers added a US value proposition within the IFSL Avellemy US Equity fund, into which the sub-fund invests. A mandate run by BNY Mellon providing US equity income exposure was also added, to bring the sector exposure of the IFSL Avellemy US Equity fund more in line with that of the US market, and take profit from positions which had outperformed, notably in the technology sector.

^B Prior to 2 July 2024, the sub-fund's performance was assessed against the MSCI Multi-Asset Dynamic Planner 5 index.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the six month period ended 31 July 2024

Investment commentary (continued)

Benchmark change

From 2 July 2024 the benchmark for the sub-fund changed from the MSCI Dynamic Planner 5 index to the Investment Association (IA) Mixed Investment 40-85% Shares sector. Benchmark performance numbers referred to in this commentary therefore represent a combination of returns achieved via the MSCI Dynamic Planner index to 1 July 2024 and the IA sector from 2 July 2024.

The primary reason for this change is to represent comparative performance of our sub-fund more accurately versus alternatives that clients might have selected, rather than a comparator that is intended to inform investment management, i.e. MSCI Dynamic Planner.

The change does not reflect any changes to the ongoing management of the sub-fund: Avellemy will continue to manage our strategic asset allocation with reference to MSCI Dynamic Planner's risk levels as we do now. We are simply comparing the subsequent performance with benchmarks that better represent alternative investments a client might have considered alongside Avellemy. Neither does the change of benchmark affect the charges or terms and conditions of the sub-fund in any way. The Prospectus and KIID have been updated to reflect the change.

Avellemy Limited 20 August 2024

Explanation of terms*

Benchmark - comparator for performance purposes.

Yield - the income from an investment, usually stated as a percentage of the value of the investment.

Monetary policy - action that a country's central bank or government can take to influence how much money is in the economy and how much it costs to borrow. Tight monetary policy aims to slow down a growing economy by increasing interest rates. Loose monetary policy aims to expand or grow an economy by lowering interest rates.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the period. Where it is considered unsuitable to use the total expenses paid by each share class in the period to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 4 because its investments have experienced moderate volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

^B On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^C These figures have been annualised.

^A Launch period ended 13 May 2019.

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance statement

The sub-fund's A Accumulation shares returned 7.31% over the six month period to 31 July 2024, compared to a return of 6.59% for the sub-fund's benchmark*.

Market review

It has been a strong six-months for equity markets, with particular success enjoyed by companies whose business models are linked to the development of artificial intelligence (AI) technology. In addition, emerging market and Asian equities have enjoyed a relative resurgence following a difficult year in 2023, and the UK equity market has performed well despite its limited exposure to the AI theme.

Fixed income assets enjoyed a more muted six-months although interest rate cuts from some European central banks later in the period were a tailwind, as were increasing fears of an economic slowdown in July. This caused bond yields* to fall and correspondingly, prices of fixed income assets to rise through the month. Overall, economic data continues to paint a mixed picture on the health of global growth, which had left central bankers reluctant to loosen monetary policy* too soon. This narrative is slowly changing, and a number of key central banks have begun to bring interest rates down, which should be supportive of growth in the future.

Sub-fund performance review

The sub-fund underperformed its benchmark over the period, despite most underlying manager allocations delivering positive relative performance.

Notable amongst these was outperformance across key equity sectors and the fixed income allocation to international bonds.

Key equity allocations in the UK and the US both outperformed reference benchmarks in a period of strong absolute returns. The subfund's Japanese and European allocations also outperformed their comparator sectors by 2.7% and 2% respectively providing a tailwind to relative returns.

Key negative drivers to relative returns over the period were the benchmark's allocation to equity of larger companies versus our portfolio, which has a more blended allocation across a range of underlying companies within the equity portfolio. In addition, underperformance of our Asian and emerging market equity allocations contributed to the relative underperformance in the period.

Portfolio activity

The investment managers amended their Asian, emerging market and US equity allocations over the period.

Firstly, they replaced the Veritas Asian fund with Stewart Investors Asia Pacific Leaders Sustainability fund. This change had the effect of decreasing the portfolio's allocation to China and increasing the weighting to Indian equities.

They also exited the Schroder Global Emerging Markets fund in the period, replacing it with the Artemis Smart GARP Global Emerging Market fund to modify the exposure of the blend, giving greater prominence to companies deemed to be trading cheaply relative to their fundamental strength.

The investment managers added a US value proposition within the IFSL Avellemy US Equity fund, into which the sub-fund invests. A mandate run by BNY Mellon providing US equity income exposure was also added, to bring the sector exposure of the IFSL Avellemy US Equity fund more in line with that of the US market, and take profit from positions which had outperformed, notably in the technology sector.

^B Prior to 2 July 2024, the sub-fund's performance was assessed against the MSCI Multi-Asset Dynamic Planner 6 index.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the six month period ended 31 July 2024

Investment commentary (continued)

Benchmark change

From 2 July 2024 the benchmark for the sub-fund changed from the MSCI Dynamic Planner 6 index to the Investment Association (IA) Mixed Investment 40-85% Shares sector. Benchmark performance numbers referred to in this commentary therefore represent a combination of returns achieved via the MSCI Dynamic Planner index to 1 July 2024 and the IA sector from 2 July 2024.

The primary reason for this change is to represent comparative performance of our sub-fund more accurately versus alternatives that clients might have selected, rather than a comparator that is intended to inform investment management, i.e. MSCI Dynamic Planner.

The change does not reflect any changes to the ongoing management of the sub-fund: Avellemy will continue to manage our strategic asset allocation with reference to MSCI Dynamic Planner's risk levels as we do now. We are simply comparing the subsequent performance with benchmarks that better represent alternative investments a client might have considered alongside Avellemy. Neither does the change of benchmark affect the charges or terms and conditions of the sub-fund in any way. The Prospectus and KIID have been updated to reflect the change.

Avellemy Limited 20 August 2024

Explanation of terms*

Benchmark - comparator for performance purposes.

Yield - the income from an investment, usually stated as a percentage of the value of the investment.

Monetary policy - action that a country's central bank or government can take to influence how much money is in the economy and how much it costs to borrow. Tight monetary policy aims to slow down a growing economy by increasing interest rates. Loose monetary policy aims to expand or grow an economy by lowering interest rates.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the period. Where it is considered unsuitable to use the total expenses paid by each share class in the period to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

^B On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^C These figures have been annualised.

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

Lower risk						Higher risk	
							
Typically lower rew	ards				Туріс	cally higher rewards	
1	2	3	4	5	6	7	

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

External Source of Economic Data: Morningstar (A Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance statement

The sub-fund's A Accumulation shares returned 8.47% over the six month period to 31 July 2024, compared to a return of 6.51% for the sub-fund's benchmark*.

Market review

It has been a strong six-months for equity markets, with particular success enjoyed by companies whose business models are linked to the development of artificial intelligence (AI) technology. In addition, emerging market and Asian equities have enjoyed a relative resurgence following a difficult year in 2023, and the UK equity market has performed well despite its limited exposure to the AI theme.

Fixed income assets enjoyed a more muted six-months although interest rate cuts from some European central banks later in the period were a tailwind, as were increasing fears of an economic slowdown in July. This caused bond yields* to fall and correspondingly, prices of fixed income assets to rise through the month. Overall, economic data continues to paint a mixed picture on the health of global growth, which had left central bankers reluctant to loosen monetary policy* too soon. This narrative is slowly changing, and a number of key central banks have begun to bring interest rates down, which should be supportive of growth in the future.

Sub-fund performance review

The sub-fund underperformed its benchmark over the period, despite most underlying manager allocations delivering positive relative performance.

Key equity allocations in the UK and the US both outperformed reference benchmarks in a period of strong absolute returns. The subfund's Japanese and European allocations also outperformed their comparator sectors by 2.7% and 2% respectively providing a tailwind to relative returns.

Key negative drivers to relative returns over the period were the benchmark's allocation to equity of larger companies versus our portfolio, which has a more blended allocation across a range of underlying companies within the equity portfolio. In addition, underperformance of our Asian and emerging market equity allocations contributed to the relative underperformance in the period.

The sub-fund does not invest in government bonds or investment-grade corporate bonds. It has a small allocation to high-yield bonds which was a strong positive contributor to returns over the period, delivering a return of 7.6% over the six month period to 31 July 2024.

Portfolio activity

The investment managers amended their Asian, emerging market and US equity allocations over the period.

Firstly, they replaced the Veritas Asian fund with Stewart Investors Asia Pacific Leaders Sustainability fund. This change had the effect of decreasing the portfolio's allocation to China and increasing the weighting to Indian equities.

They also exited the Schroder Global Emerging Markets fund in the period, replacing it with the Artemis Smart GARP Global Emerging Market equity fund to modify the exposure of the blend, giving greater prominence to companies deemed to be trading cheaply relative to their fundamental strength.

The investment managers added a US value proposition within the IFSL Avellemy US Equity fund, into which the sub-fund invests. A mandate run by BNY Mellon providing US equity income exposure was also added, to bring the sector exposure of the IFSL Avellemy US Equity fund more in line with that of the US market, and take profit from positions which had outperformed, notably in the technology sector.

^B Prior to 2 July 2024, the sub-fund's performance was assessed against the MSCI Multi-Asset Dynamic Planner 7 index.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the six month period ended 31 July 2024

Investment commentary (continued)

Benchmark change

From 2 July 2024 the benchmark for the sub-fund changed from the MSCI Dynamic Planner 7 index to the Investment Association (IA) Flexible Investment sector. Benchmark performance numbers referred to in this commentary therefore represent a combination of returns achieved via the MSCI Dynamic Planner index to 1 July 2024 and the IA sector from 2 July 2024.

The primary reason for this change is to represent comparative performance of our sub-fund more accurately versus alternatives that clients might have selected, rather than a comparator that is intended to inform investment management, i.e. MSCI Dynamic Planner.

The change does not reflect any changes to the ongoing management of the sub-fund: Avellemy will continue to manage our strategic asset allocation with reference to MSCI Dynamic Planner's risk levels as we do now. We are simply comparing the subsequent performance with benchmarks that better represent alternative investments a client might have considered alongside Avellemy. Neither does the change of benchmark affect the charges or terms and conditions of the sub-fund in any way. The Prospectus and KIID have been updated to reflect the change.

Avellemy Limited 20 August 2024

Explanation of terms*

Benchmark - comparator for performance purposes.

Yield - the income from an investment, usually stated as a percentage of the value of the investment.

Monetary policy - action that a country's central bank or government can take to influence how much money is in the economy and how much it costs to borrow. Tight monetary policy aims to slow down a growing economy by increasing interest rates. Loose monetary policy aims to expand or grow an economy by lowering interest rates.

A Opening net asset value per share on 19 July 2021.

B The return after charges is calculated using the underlying investments bid prices.

C On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^D These figures have been annualised.

^A The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the period. Where it is considered unsuitable to use the total expenses paid by each share class in the period to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

^B On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^C These figures have been annualised.

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

Lower risk			Higher risk			
						
Typically lower rew	vards				Typic	cally higher rewards
1	2	3	4	5	6	7

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

	Six months	<u>1 year</u>	<u>3 years</u>	<u>29.04.2020</u>
IFSL Avellemy 8	7.73%	7.82%	1.16%	31.00%
IA Flexible Investment ^B	6.51%	9.87%	7.38%	38.56%

^A Launch period ended 28 April 2020.

External Source of Economic Data: Morningstar (A Accumulation - quoted to quoted).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this share class is calculated in sterling.

Investment commentary

Performance statement

The sub-fund's A Accumulation shares returned 7.73% over the six month period to 31 July 2024, compared to a return of 6.51% for the sub-fund's benchmark*

Market review

It has been a strong six-months for equity markets, with particular success enjoyed by companies whose business models are linked to the development of artificial intelligence (AI) technology. In addition, emerging market and Asian equities have enjoyed a relative resurgence following a difficult year in 2023, and the UK equity market has performed well despite its limited exposure to the AI theme.

Fixed income assets enjoyed a more muted six-months although interest rate cuts from some European central banks later in the period were a tailwind, as were increasing fears of an economic slowdown in July. This caused bond yields to fall and correspondingly, prices of fixed income assets to rise through the month. Overall, economic data continues to paint a mixed picture on the health of global growth, which had left central bankers reluctant to loosen monetary policy too soon. This narrative is slowly changing, and a number of key central banks have begun to bring interest rates down, which should be supportive of growth in the future.

Sub-fund performance review

The sub-fund underperformed its benchmark over the period, despite most underlying manager allocations delivering positive relative performance.

Key equity allocations in the UK and the US both outperformed reference benchmarks in a period of strong absolute returns. The subfund's Japanese and European allocations also outperformed their comparator sectors by 2.7% and 2% respectively providing a tailwind to relative returns.

Key negative drivers to relative returns over the period were the benchmark's allocation to equity of larger companies versus our portfolio, which has a more blended allocation across a range of underlying companies within the equity portfolio. In addition, underperformance of our Asian and emerging market equity allocations contributed to the relative underperformance in the period. These form a significant allocation within the sub-fund, and as such their contribution to underperformance was relatively significant.

The sub-fund has a small allocation to high-yield bonds which was a strong positive contributor to returns over the period, delivering a return of 7.6% over the six month period to 31 July 2024.

Portfolio activity

The investment managers amended their Asian, Emerging market and US equity allocations over the period.

Firstly, they replaced the Veritas Asian fund with Stewart Investors Asia Pacific Leaders Sustainability fund. This change had the effect of decreasing the portfolio's allocation to China and increasing the weighting to Indian equities.

They also exited the Schroder Global Emerging Markets fund in the period, replacing it with the Artemis Smart GARP Global Emerging Market equity fund to modify the exposure of the blend, giving greater prominence to companies deemed to be trading cheaply relative to their fundamental strength.

The investment managers added a US value proposition within the IFSL Avellemy US Equity fund into which the sub-fund invests. A mandate run by BNY Mellon providing US equity income exposure was added, to bring the sector exposure of the fund more in line with that of the US market, and take profit from positions which had outperformed, notably in the technology sector.

^B Prior to 2 July 2024, the sub-fund's performance was assessed against the MSCI Multi-Asset Dynamic Planner 8 index.

AUTHORISED INVESTMENT MANAGER'S REPORT

for the sixth month period ended 31 July 2024

Investment commentary (continued)

Benchmark change

From 2 July 2024 the benchmark for the sub-fund changed from the MSCI Dynamic Planner 8 index to the Investment Association (IA) Flexible Investment sector. Benchmark performance numbers referred to in this commentary therefore represent a combination of returns achieved via the MSCI Dynamic Planner index to 1 July 2024 and the IA sector from 2 July 2024.

The primary reason for this change is to represent comparative performance of our sub-fund more accurately versus alternatives that clients might have selected, rather than a comparator that is intended to inform investment management, i.e. MSCI Dynamic Planner.

The change does not reflect any changes to the ongoing management of the sub-fund: Avellemy will continue to manage our strategic asset allocation with reference to MSCI Dynamic Planner's risk levels as we do now. We are simply comparing the subsequent performance with benchmarks that better represent alternative investments a client might have considered alongside Avellemy. Neither does the change of benchmark affect the charges or terms and conditions of the sub-fund in any way. The Prospectus and KIID have been updated to reflect the change.

Avellemy Limited 20 August 2024

Explanation of terms*

Benchmark - comparator for performance purposes.

Yield - the income from an investment, usually stated as a percentage of the value of the investment.

Monetary policy - action that a country's central bank or government can take to influence how much money is in the economy and how much it costs to borrow. Tight monetary policy aims to slow down a growing economy by increasing interest rates. Loose monetary policy aims to expand or grow an economy by lowering interest rates.

^A Opening net asset value per share on 12 March 2021.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each share class in the period. Where it is considered unsuitable to use the total expenses paid by each share class in the period to calculate the OCF because of material changes to the sub-fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

^B The return after charges is calculated using the underlying investments bid prices.

^C On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

^D These figures have been annualised.

SYNTHETIC RISK AND REWARD INDICATOR (all share classes)

Lower risk						Higher risk
						
Typically lower rew	/ards				Typic	cally higher rewards
1	2	3	4	5	6	7

This indicator aims to give you a measure of the price movement of the sub-fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

The sub-fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.
