#### **AUTHORISED INVESTMENT MANAGER'S REPORT**

for the six month period ended 31 March 2024

#### Performance to 31 March 2024

	Six months	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>	<u>10 years</u>	<u>25/11/2002*</u>
IFSL Hathaway Fund	8.56%	6.81%	1.13%	19.96%	75.80%	344.78%
IA Mixed Investment 40% - 85% Shares	10.16%	10.12%	10.65%	29.13%	72.77%	282.80%

<sup>\*</sup> Launch date of IFSL Hathaway Fund.

External Source of Economic Data: Morningstar (Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this unit class is calculated in sterling.

#### Investment commentary

#### Recent performance

Against a background of a further worsening international security environment, with conflict now also in the Middle East and continuing high interest rates, it is welcome to record an encouraging outcome for the half year, although the disappointments of 2022 are still reflected in the medium-term numbers.

Since the latest returns were strengthened though, by gratifying long-term [over five years] numbers, the latter record very much remains intact: this time, our Fund's Accumulation units posted a return of 8.6% for the half year ended 31 March 2024, reflecting a 17.5p increase in price. Launched in 2002 at 50p, accumulation units are now priced at 222.39p, reflecting annual compounding\* at 7.2% over our first 21½ years (up from the 6.9% annual rate recorded in September). We remain reassuringly ahead of our peer group benchmark\*\*, the Investment Association Mixed Investment 40% - 85% Shares sector, over ten years and since launch, although we clearly have ground to make up over shorter periods.

To summarize recent performance then: with our long-term percentage advantage remaining very much in place, we trust that shorter periods will soon follow suit.

# Investing conditions - inflation

We covered this subject in the annual report and - no boasting - recorded our considerable outperformance of rising prices since we launched; suffice to say here, that our advantage robustly remains in place, as the rate of price increases is subsiding.

Nonetheless, we remain vigilant as to the effects on our portfolio.

#### Investing conditions - portfolio developments

The general theme of our remarks here is unchanged from the annual report, with us continuing to expect a recovery in certain stocks, but with much of the lost ground in fact now made up, although of course alongside a few disappointments.

Meanwhile, our portfolio members continued to post satisfactory business reports, whatever their shares did while, for the most part, their share prices indeed started catching up with their owners' economic performance.

Almost inevitably though, after such a stunning 2023 return, Games Workshop (tabletop war games) saw its shares fall 5% in the six months, but Next (UK clothes retailing) added a further 27%, Babcock (heavy maintenance etc.) reflected the global security concerns we opened with, and was up 29%, but Britvic (soft drinks) slipped 5%; Tesco though (food retailing), added a further 13%.

Our disappointment, described in the annual report, in the 40% decline of Somero (cement screeding) last year, was alleviated somewhat by its healthy 23% recovery this time, while Techtronic (electric DIY tools) - also weak last year - made up lost ground and was up 42%.

Meanwhile, also on the recovery list, Big Yellow Group ended the half year up 15%.

Diageo (Gordon's Gin & Johnnie Walker whisky worldwide) was unchanged in the six months, as it sought to arrest material business weakness in South America, but at least its shares declined no further.

The shine of a generally robust team performance was taken off then, by that slight retrenchment of Games Workshop & Britvic, the malaise in Diageo shares and by an 11% decline in Travis Perkins.

The conclusion about the latest six months is clear though: a more "usual" period under review.

# **AUTHORISED INVESTMENT MANAGER'S REPORT**

for the six month period ended 31 March 2024

#### Investment commentary (continued)

# Outlook - what our investors may expect

We anticipate a continued recovery in our stocks, although it may take longer than we would like; all investors meanwhile, may be in for further turbulence. Generally, investors continue to concentrate on the very short term: hence the volatility still stalking stock markets worldwide and, for example, the feverish speculation in gold.

So, we will continue value investing amidst the mayhem, while we ask unitholders, as ever, to keep their expectations rational; all the quotes from famous people we have used, over the years, remain doubly appropriate.

In closing, we again thank IFSL for their accurate administration. We look forward to reporting our annual results in the autumn and unitholders requiring up to date prices etc., should refer to our website.

# Portfolio changes

There were no purchases or sales during the six month period ended 31 March 2024.

<sup>\*</sup> Annual compounding means that interest rate which, if uniformly applied each year over a given period, would arrive at the actual result; thus: 50p becomes 222.39p over 21 1/2 years at an annual rate of 7.2%. Returns naturally differ widely in fact from period to period; compound interest/annual compounding - usually expressed on an annual basis - smooths the numbers, without compromising accuracy.

<sup>\*\*</sup> A benchmark is a comparator fund or appropriate group of funds/index, against which a fund's performance is measured; it is used to evaluate a fund by comparing its returns over time, most usefully over the long term.

#### **AUTHORISED STATUS**

IFSL Hathaway Fund (the Fund) is an authorised unit trust scheme within the meaning of the Financial Services and Markets Act 2000 and is a UCITS scheme operating under the Collective Investment Schemes Sourcebook (COLL) as issued by the Financial Conduct Authority.

#### **GENERAL INFORMATION**

#### Investment objective

The investment objective of the Fund is to grow the value of a unitholder's capital and income, over a period of at least 5 years. This growth is expected to come from a combination of gains in investments held and income received by the Fund - such as bond interest and dividends from shares.

# Investment policy

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when, across different industries and regions of the world.

The Investment Manager considers economic and market conditions, but the focus is on individual company analysis. The aim is to identify companies which show good long-term growth potential, and which appear to be undervalued given their prospects.

The Fund will invest between 40 - 85% of its portfolio in the shares of companies. There will be a bias towards enterprises that are expected to pay steady dividends; however, the Fund may occasionally invest in securities which do not pay dividends.

The Fund will invest between 15 - 60% of its portfolio in bonds, which are loans typically issued by companies, governments and other institutions. These will typically be investment grade bonds, where the issuer has a high and reliable capacity to repay the debt. However, from time to time, our operations may include sub-investment grade bonds (which can be more vulnerable to changing market conditions, but typically pay a higher rate of interest) where we judge them to be incorrectly downgraded.

The Fund may also invest in money market instruments, which are shorter term loans.

The Fund will hold cash to enable the ready settlement of liabilities and for the efficient management of the portfolio. The Fund may hold cash up to a maximum of 30%, in extreme market conditions.

# Assessing performance

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Mixed investment 40-85% Shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

### Rights and terms attaching to each unit class

A unit of each class represents a proportional entitlement to the assets of the Fund. The allocation of income and taxation and the rights of each unit in the event the Fund is wound up are on the same proportional basis.

# Changes in prospectus

There have been no significant changes since the last report.

Up to date Key Investor Information Documents, Prospectus and Long Reports and Financial Statements for any fund within the AFM's range, can be requested by the investor at any time.

# **DIRECTORS' STATEMENT**

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

<sup>&</sup>lt;sup>A</sup> The return after charges is calculated using the underlying investments bid prices.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each unit class in the period. Where it is considered unsuitable to use the total expenses paid by each unit class in the period to calculate the OCF because of material changes to the Fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, www.ifslfunds.com) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the Fund. These amounts are expressed as a percentage of the average net asset value over the period and the average units in issue for the pence per unit figures.

<sup>&</sup>lt;sup>B</sup> On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

<sup>&</sup>lt;sup>C</sup> These figures have been annualised

# SYNTHETIC RISK AND REWARD INDICATOR (all unit classes)

Lower risk						Higher risk
<del></del>						<del></del>
Typically lower rew	vards				Typic	cally higher rewards
1	2	3	4	5	6	7

This indicator aims to give you a measure of the price movement of the Fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

# NOTES TO THE INTERIM FINANCIAL STATEMENTS

for the six month period ended 31 March 2024

# Basis for preparation

The interim financial statements have been prepared in compliance with UK Financial Reporting Standard 102 ("FRS 102") and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds issued by the Investment Association in May 2014 and amended in June 2017.

The interim financial statements are prepared in sterling, which is the functional currency of the Fund. Monetary amounts in these financial statements are rounded to the nearest pound.

The interim financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

# **Accounting policies**

The accounting policies applied are consistent with those of the annual financial statements for the year ended 30 September 2023 and are described in those annual financial statements.

The investments of the Fund have been valued at their fair value at 12 noon on 28 March 2024.
